I. INTRODUCTION - MISSION STATEMENT

The goal of the Surgical Critical Care Fellowship Program at UCSD Medical Center, Department of Surgery, is to provide an outstanding exposure to complex surgical critical care and develop administrative skills compatible with making fellows able to emerge into a leadership role. Specific educational agenda and set of core didactic experiences have been developed to assure that the aspects of critical care that are core to this understanding and the skills essential to delivering excellent critical care are provided.

II. PROGRAM PHILOSOPHY AND GOALS AND OBJECTIVES

Philosophy

The care of the most severely ill or injured patients requires the cooperation of multiple specialties, but we believe that surgeons with advanced knowledge and training are the vital central element. The goal of this residency is to provide an intensive one-year experience in surgical critical care which will train surgeons to assume a leadership role in the care of critically ill patients and be prepared to assume an administrative role in managing a busy surgical intensive care unit. The specific goals in this regard are to obtain experience in the multidisciplinary care of sick surgical patients and have exposure to all elements of the domain of critical care knowledge and related procedures. This will form a focus of clinical material upon which to develop the basics of administrating a busy SICU and integrating multiple practitioners in this complex environment.

The educational philosophy is to teach not only the individual basics of care of sick surgical patients, but to teach the integration of care through multiple practitioners in the interdisciplinary process. Philosophically we maintain an open unit which is integrated with the primary surgeon and teaches the critical care fellows how to manage patients in this environment which is the most likely environment the fellow will encounter in their practice. An additional philosophic goal is to have exposure to all types of surgical critical care patients to maintain an expanded knowledge.

The initial year of the residency focuses on gaining advanced skills and knowledge in clinical aspects of patient care and the basics of surgical intensive care administration. Candidates desiring to pursue a career in academic surgery may participate in an optional second year of training which will offer the opportunity to focus on a specific area of scholarly pursuit while continuing to participate in clinical management. The program will allow the second year fellow to focus on bench research in the basic sciences or to pursue further training in the epidemiology and statistics.

A surgical critical care fellow will be directly involved in all phases of care of critically ill surgical patients. The focus of the clinical experience will center around the 20 bed combined surgical intensive care unit, with optional rotations on the 8 bed burn unit. The case mix on the surgical intensive care unit includes approximately 25% trauma patients, 25% general surgery and transplant patients, 25% neurosurgery patients, and 25% cardiothoracic
surgery. In addition, subspecialty admissions in other surgical subspecialties are admitted to this unit. The trauma resuscitation area is a physical part of the surgical intensive care unit. Initial resuscitation management of trauma patients is a unique and integral part of the training in surgical critical care offered in this residency. Trauma resuscitation may involve emergency surgical procedures required for stabilization, but will not involve surgical procedures done on an elective or semi-elective basis.

The fellow will take in-house call every fourth night during which they will be responsible for care of all of the SICU and incoming injured patients under the supervision of an attending faculty member. One of the attending faculty will make daily rounds in the SICU. The daily SICU rounds consist of clinical decision making, integrated with didactic teaching. Topics of daily discussion are based on current clinical problems to allow for practical application of newly acquired knowledge. A sit down hourly conference is part of each day’s rounding Monday through Friday and is based on collected readings and current patient problems.

Didactic teaching is accomplished through a number of specific conferences. These include: 1) daily bedside rounds and daily conferences covering topics from a teaching syllabus prepared specifically for the surgical intensive care unit at UCSD; 2) Tuesday afternoon critical care lecture series; 3) Tuesday afternoon resuscitation conference; 4) Weekly research conference where clinical projects and the basics of clinical research are reviewed; 5) Wednesday afternoon journal club which covers core topics throughout the year; 6) Alternating Friday orthopedics combined conference; 7) Monthly Friday neurosurgery combined conference; 8) Wednesday morning Surgery M&M where complications are discussed; 9) monthly SICU user group where concepts of administration are discussed with the nursing staff and other paramedical personnel supporting the SICU; 10) Monthly Resident Core Lecture Series, and 11) fellows are invited to attend the monthly Medical Audit Committee for the care of injured and sick patients within San Diego County and allowed to see how this process is administrated. The fellow will participate when they prepare the materials.

**Goals and Objectives**

1. Become proficient in surgical critical care knowledge in the following areas:
   a. Cardiothoracic-respiratory resuscitation
   b. Physiology, pathophysiology, diagnosis, and therapy of disorders of the cardiovascular, respiratory, gastrointestinal, genitourinary, neurologic, endocrine, musculoskeletal, and immune systems as well as of infectious diseases.
   c. Metabolic, nutritional, and endocrine effects of critical illness
   d. Hematologic and coagulation disorders
   e. Critical obstetric and gynecologic disorders
   f. Trauma, thermal, electrical, radiation, inhalation and immersion injuries
   g. Monitoring and medical instrumentation
   h. Critical pediatric surgical conditions
   i. Pharmacokinetics and dynamics of drug metabolism and excretion in critical illness
   j. Ethical and legal aspects of surgical critical care
   k. Principles and techniques of administration and management
   l. Biostatistics and experimental design
2. Become proficient in surgical critical care skills in the following areas:

   a. Respiratory airway management including endoscopy and management of respiratory systems.
   b. Circulatory: invasive and non-invasive monitoring techniques, including transesophageal and precordial cardiac ultrasound and application of transvenous pacemakers, computations of cardiac output and of system and pulmonary vascular resistance; monitoring electrocardiograms and management of cardiac assist devices.
   c. Neurological: the performance of complete neurological examinations; use of intracranial pressure monitoring techniques and the electroencephalogram to evaluate cerebral function; application of hypothermia in the management of cerebral trauma.
   d. Renal: the evaluation of renal function, peritoneal dialysis and hemofiltration, knowledge of the indications of complications of hemodialysis.
   e. Gastrointestinal: utilization of gastrointestinal intubation and endoscopic techniques in the management of the critically ill patient; application of enteral feeds, management of stomas, fistulas, and percutaneous catheter devices.
   f. Hematologic: application of autotransfusion, assessment of coagulation status, appropriate use of component therapy.
   g. Infectious Disease: classification of infections and application of isolation techniques, pharmacokinetics, drug interactions, and management of antibiotic therapy during organ failure, nosocomial infections, indications for applications of hyperbaric oxygen therapy.
   h. Nutritional: application of parenteral and enteral nutrition, monitoring and assessing metabolism and nutrition.
   i. Monitoring/bioengineering: use and calibration of transducers, amplifiers, and recorders.
   j. Miscellaneous: use of special beds for specific injuries; employment of pneumatic antishock garments, traction, and fixation devices.

1. Details of Goals and Objectives - Core Knowledge

1.a. Cardiothoracic-respiratory resuscitation.

   Exposure: Daily SICU rounds; SICU daily resident conference. Fellows are exposed to cardiothoracic-respiratory resuscitation on a daily basis. In addition, fellows will maintain ACLS and BLS skills. The fellows interact on a daily basis with SICU faculty and cardiothoracic surgery service, as well as the cardiology consult service in day-to-day clinical work.

   Specific objectives are: SICU Handbook pp: 150-155, 486-530; Critical Care Journal Club: weekly; Critical Care/Trauma Case Conference: weekly

1.b. Physiology, pathophysiology, diagnosis, and therapy of disorders of the cardiovascular, respiratory, gastrointestinal, genitourinary, neurologic, endocrine, musculoskeletal, and immune systems as well as of infectious diseases.
Exposure: Daily SICU rounds; SICU daily resident conference. All topics are covered when faced in the SICU and discussed extensively on daily teaching rounds. The SICU faculty is experienced and well qualified, and additional specialty support is obtained through interaction with consultants and attendings from other surgical services, including transplant, infectious disease, orthopedics, and neurosurgery. In addition, specific conferences with neurosurgery and orthopedics occur.

1.c. Metabolic, nutritional, and endocrine effects of critical illness.

Exposure: Daily SICU rounds; SICU daily resident conference. This aspect of surgical critical care will be acquired through daily interaction with critical care faculty, supplementary reading, and formal lecture material. The metabolic and nutritional care of surgical patients is a fundamental component of treatment. The discussion of metabolism, appropriate feeding of patients, and the use of enteral feeding to prevent complications is part of routine daily care.

Specific objectives are: SICU Handbook: pp: 538-562; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly

1.d. Hematologic and coagulation disorders.

Exposure: Daily SICU rounds; SICU daily resident conference. The majority of hematologic and coagulation disorders will be covered by critical care faculty with participation with hematology consulting attendants in unusual cases. The format includes daily clinical interactions over patients who have developed specific coagulation disorders as well as didactic material.

Specific objectives are: SICU Handbook: pp: 649-702; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly

1.e. Critical obstetric and gynecologic disorders.

Exposure: Daily SICU rounds; SICU daily resident conference. The fellow will be involved in the care of critically ill patients in the OB/GYN service and any patient admitted to the SICU is generally managed primarily by the SICU service. The OB/GYN staff rely heavily on input from the SICU service in the management of their patients and the attending staff provides specialty-specific input. Clinical material will be supplemented with reading and lecture topics.

Specific objectives are: Critical Care Journal Club: weekly.

1.f. Trauma, thermal, electrical, radiation, inhalation and immersion injuries.
Exposure: Daily SICU rounds; SICU daily resident conference. The fellows will participate extensively in the management of patients admitted to San Diego County’s Level I Trauma Center. The trauma system in San Diego and the trauma center at UCSD have a nationwide reputation for excellence. Many of the critical care faculty have a strong dedication to the care of the trauma patient and contribute actively to the literature. The burn unit is also quite busy serving a large region of Southern California and trauma and burn experience is central to our training. Participation on the burn service is optional, but some fellows have chosen to participate and have found this to be a useful experience.

Specific objectives are: In addition to the high volume experience, specific didactic exercises include: Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly; Combined Resus Conference (Neurosurgery): monthly; Combined Conference (Orthopedics): every other week.

1.g. Monitoring and medical instrumentation.

Exposure: Daily SICU rounds; SICU daily fellow conference. There is a vast clinical experience in the use of clinical monitoring devices including all components of hemodynamic, intracranial pressure, and respiratory monitoring. The majority of SICU patients are monitored invasively and provide a rich basis for this experience. We are involved in clinical research evaluating and developing modality such as continuous cardiac output measurement and non-invasive measurements of intracranial pressure measurement. In addition, metabolic monitoring and respiratory monitoring are active clinical projects at UCSD.

Specific objectives are: SICU Handbook: pp: 23-56; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly.

1.h. Critical pediatric surgical conditions.

Exposure: Daily SICU rounds when pediatric patients are admitted to the trauma service; SICU daily fellow conference when pediatric critical care issues are discussed as part of the main topic for the day. The fellow will be involved in the care of pediatric patients who are injured.

Specific objectives are: Critical Care Journal Club: Pediatric components of all topics are discussed weekly; Critical Care/Trauma Conference: weekly.

1.i. Pharmacokinetics and dynamics of drug metabolism and excretion in critical illness.

Exposure: Daily SICU rounds; SICU daily resident conference. The SICU has an active clinical pharmacy service. Fellows will interact on a daily basis with pharmacy staff as well as in a lecture setting. Pharmacokinetics are measured directly in the surgical ICU pharmacy, a unique aspect of our SICU, and fellows are exposed to the techniques and mathematics of drug monitoring and drug calculations. In addition, active discussion of
drug metabolism and excretion is discussed on daily rounds as the pharmacist is part of the multidisciplinary daily rounding team.

Specific objectives are: SICU Handbook: pp. 630-634; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly

1.j. Ethical and legal aspects of surgical critical care.

Exposure: Daily SICU rounds; SICU daily resident conference. Attendings on the surgical critical care service are deeply involved in both the ethical and legal issues surrounding critical care. One faculty member is currently serving on the Hospital Ethics Committee and interactions with faculty will be supplemented by reading material and teaching conferences. The fellow is expected to participate in all case referrals to the ethics committee and participate in this important process.

Specific objectives are: SICU Handbook: pp. 5-22; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly; UCSD Resident Core Lecture Series: monthly.

1.k. Principles and techniques of administration and management.

Exposure: Daily SICU rounds; SICU daily resident conference. Active effort is made to involve the fellows in the skills necessary for efficient administration and management with an eye toward a leadership role during their career. The fellows will work closely with the nursing and various SICU support services and with the medical director of the intensive care unit to learn the principles of administration. The fellows participate actively in the SICU users group meetings which functions to fulfill the administrative issues. Fellows also participate in the evaluation of outcomes and the process of continuing quality improvement within the SICU and are actively involved in the development of guidelines and guideline derived outcome measures. The fellows are actively involved in the ongoing structure and content of the educational program as well, and are actively involved in changing this to suit their individual needs.

Specific objectives are: SICU Users Group Committee; San Diego Medical Audit Committee; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly; UCSD Resident Core Lecture Series: monthly.

1.l. Biostatistics and experimental design.

Exposure: The fellows are involved with several active ongoing clinical research projects and there is a full time epidemiologist in our department who provides a core biostatistics course during the Wednesday afternoon research conferences to which the fellows attend. In addition, there is a hospital based formal eight-week statistics course which fellows participate in and reinforces the foundation of biostatistics.

In addition, the department is involved in many clinical SICU studies including the evaluation of DVT prophylaxis, immunologic assessment of infection risk, evaluation of an anti-CD-18 antibody, the use of a blood substitute, and the evaluation of enteral vs.
parenteral nutrition for immune modulation. In addition, there are multiple projects in neurosurgery, cardiothoracic surgery, and the fellows are exposed to ongoing clinical projects in addition to having the opportunity to participate in these specifically.

Overall, our department is extensively involved in all types of research including epidemiology, clinical projects, and basic bench research with NIH sponsorship.

Specific objectives are: Critical Care Journal Club: weekly; Applied Biostatistics Conference: 8 week course offered by UCSD General Clinical Research Center.

2. Details of Goals and Objectives – Critical Care Skills

2.a. Respiratory airway management including endoscopy and management of respiratory systems.

Exposure: Daily SICU rounds; SICU daily resident conference. Fellows will participate in the airway management of all patients in the ICU and the initial management of trauma patients. There is an active bronchoscopy service and fellows will participate in the unit. Specific protocols for airway management are followed and use of bronchoscopy and endoscopy to assess complex airways is practiced on a daily basis.

Specific objectives are: SICU Handbook: pp: 125-365, 703-762; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly.

2.b. Circulatory: invasive and noninvasive monitoring techniques, including transesophageal and precardial cardiac ultrasound and application of transvenous pacemakers, computations of cardiac output and of system and pulmonary vascular resistance; monitoring electrocardiograms and management of cardiac assist devices.

Exposure: Daily SICU rounds; SICU daily resident conference. The supervised use of invasive and noninvasive techniques in the SICU occurs on a daily basis. All modalities used during the average year include arterial lines, pulmonary artery catheters, transesophageal echo, measurement of mixed venous blood gases, calculation and interpretation of ECGs, treatment of acute arrhythmias, the use of transvenous pacemakers, the use of external pacemakers, the use of ECMO and IABP. The fellows are actively involved in any patients needing this kind of care and are exposed to the principles and pitfalls.

Specific objectives are: SICU Handbook: pp: 366-530; Critical Care Journal Club: weekly; Critical Care/Trauma Conference: weekly.

2.c. Neurological: the performance of complete neurological examinations; use of intracranial pressure monitoring techniques and the electroencephalogram to evaluate cerebral function; application of hypothermia in the management of cerebral trauma.

Exposure: Daily SICU rounds; SICU daily resident conference. The fellows are directly involved in the care of head trauma and post neurosurgical patients through supervised clinical activity and a close relationship with the department of neurosurgery.
All care on neurosurgical patients is shared with the neurosurgery service and neurosurgery attendings. Treatment modalities include maintenance and calibration of ICP monitors, the development of a new non-invasive ICP measuring device, interpretation and treatment of ICP problems, and the management of cerebral perfusion pressure, barbiturate coma, vasospasm, and optimization of cerebral perfusion pressure.

Specific objectives are: SICU Handbook: pp: 57-124, 763-790; Critical Care Journal Club: 9, 11, 36, 37, 47; Critical Care/Trauma Conferences: weekly Combined Resus Conference (Neurosurgery): monthly.

2.d. Renal: the evaluation of renal function, peritoneal dialysis and hemofiltration, knowledge of the indications of complications of hemodialysis.

Exposure: Daily SICU rounds; SICU daily resident conference. Involvement in the SICU dialysis therapy under the supervision of the nephrology service is an almost daily occurrence. Approximately 50 patients per year receive dialysis therapy in the SICU, both hemodialysis and by continuous therapy. A core NIH sponsored prospective randomized trial comparing these two has been recently completed in the surgical intensive care unit and is representative of the involvement of the nephrology service in the care of these patients. The fellows are exposed to all of this activity and actively participate in the management of these patients. The nephrology attendings are very committed to surgical intensive care and enhance the fellow’s experience immensely. In addition to this, core knowledge is supplemented by readings and conferences.

Specific objectives are: SICU Handbook: pp: 569-621; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.e. Gastrointestinal: utilization of gastrointestinal intubation and endoscopic techniques in the management of the critically ill patient; application of enteral feeds, management of stomas, fistulas, and percutaneous catheter devices.

Exposure: Daily SICU rounds; SICU daily resident conference. The postoperative care of general surgery and trauma patients provides the basis for exposure to gastrointestinal skills in addition to other patients. This includes the placement of feeding tubes, the use of endoscopy, and the use of percutaneous endoscopy to place long term feeding tubes. This is all provided under the supervision of critical care and general surgery attending staff and, in addition, the management of stomas, fistulas, and percutaneous catheter devices is done with the enteral stoma nurse and the interventional radiology service.

Specific objectives are: SICU Handbook: pp: 649-702; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.f. Hematologic: application of autotransfusion, assessment of coagulation status, appropriate use of component therapy.

Exposure: Daily SICU rounds; SICU daily resident conference. The use of autotransfusion, the assessment of coagulation status, and the appropriate use of component therapy is a daily occurrence in the SICU. The autotransfuser is used in
trauma patients following chest trauma and the assessment of coagulation and use of component therapy is part of the care of virtually every patient in the ICU.

Specific courses include: SICU Handbook: pp: 649-702; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.g. Infectious Disease: classification of infections and application of isolation techniques, pharmacokinetics, drug interactions, and management of antibiotic therapy during organ failure, nosocomial infections, indications for applications of hyperbaric oxygen therapy.

Exposure: Daily SICU rounds; SICU daily resident conference. The classification of infections and use of appropriate isolation techniques, the discussion of pharmacokinetics, drug interactions and the management of antibiotic therapy is part of daily work in combination with the pharmacy service and the infectious disease service along with the critical care attendings. Evaluation of unit microbial flora and antibiotic sensitivity is accomplished on a monthly basis and guidelines using this information for use of antibiotics are developed and used for the care of all patients. The SICU has also been a study site for the CDC National Nosocomial Infection Study and we follow standard protocols for the prevention of nosocomial infection. In addition, we have specific procedures and policies for containment and body substance isolation practice to which the fellows are exposed. The fellow will also perform part of the supervisory function in maintaining these protocols throughout the hospital environment.

Specific objectives are: SICU Handbook: pp: 622-648; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.h. Nutritional: application of parenteral and enteral nutrition; monitoring and assessing metabolism and nutrition.

Exposure: Daily SICU rounds; SICU daily resident conference. Daily interaction with the nutrition service and to formulate feeding plans and provide follow-up evaluation as part of daily care. The fellows have hands on experience with direct and indirect calorimetry measurements. In addition, the fellow will participate in the formulation of monitoring data to determine the adequate compliance with guidelines regarding enteral and parenteral feeding.

Specific objectives are: SICU Handbook: pp: 538-562; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.i. Monitoring/bioengineering: use and calibration of transducers, amplifiers, and recorders.

Exposure: Daily SICU rounds; SICU daily resident conference. All fellows are supervised and instructed in the calibration and troubleshooting of all equipment in the SICU on an ongoing basis. This is done through interaction with the attendings, the nursing staff, the anesthesia technical support staff, and employees from the bioengineering department. In addition, this is supplemented by readings and specific prepared materials in the SICU handbook.
Specific objectives are: SICU Handbook: pp 23-56, 791-853; Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly.

2.j. Miscellaneous: use of special beds for specific injuries; employment of pneumatic antishock garments, traction, and fixation devices.

Exposure: Daily SICU rounds; SICU daily resident conference; The use of special beds and the use of antishock garments, traction and fixation devices is part of the exposure of fellows during the care of trauma patients with orthopedic injuries. The use of special beds for pulmonary problems including rotobeds and prone ventilation devices is part of daily experience.

Specific objectives are: Critical Care Journal Club: weekly; Critical Care/Trauma Conferences: weekly; Combined conference (Orthopedics): bimonthly.

III. CORE COMPETENCIES

Fellows are expected to demonstrate the skills, knowledge, and attitudes to meet the requirements of the following core competencies listed below. Fellows are educated on the core competencies through exposure at daily SICU rounds and weekly Grand Rounds. Fellows are also encouraged to attend core lectures presented by the UCSD Graduate Medical Education Committee to complement their daily experience.

1. Patient Care
2. Medical Knowledge
3. Practice-Based Learning and Improvement
4. Interpersonal and Communication Skills
5. Professionalism
6. Systems-Based Practice

1. Patient Care:
   a. Effectively lead patient care issues with clear communication to team, patients, family, and attendings
   b. Accurately synthesize size complex clinical data and propose clear treatment plans
   c. Actively lead team decision making
   d. Capably perform procedures suitable to trauma and surgical critical care with attending supervision

2. Medical Knowledge:
   a. Demonstrate effective decision making based on adequate knowledge
   b. Effectively correlate basic sciences knowledge with clinical scenarios
   c. Exhibit a desire for additional knowledge
   d. Appropriately use learning resources
   e. Fluent with pharmacology and physiology as it pertains to surgical critical care
1) Reads the current literature  
2) Demonstrates investigatory and analytical thinking approach to clinical situations

3. Practice-Based Learning & Improvement:
   a. Participate in conferences, M&M, etc.
   b. Knowledge of evidence-based medicine applied to critical care
   c. Adequately use scientific data to help solve clinical problems
   d. Actively contribute to team’s education by providing recent and current data as a result of literature searches

4. Interpersonal & Communication Skills:
   a. Maintain professional and cordial relationships with patients, staff, co-workers and faculty
   b. Demonstrate the ability to listen and to accept constructive criticism
   c. Demonstrate the ability to communicate efficiently with the team members, attendings, referring and consulting physicians

5. Professionalism:
   a. Demonstrate compassion, respect and integrity in the work environment
   b. Flawlessly uphold the professional standards of the surgical critical care/trauma services
   c. Respect differences in gender, age, culture, disability or educational levels
   d. Contribute to all educational activities of the surgical critical care/trauma services
   e. Has commitment to ethics of confidentiality and informed consent

6. Systems-Based Practice:
   a. Understand one’s position within the team, specialty, profession and society
   b. Demonstrate sensitivity and awareness at the cost of health care delivery
   c. Advocate for cost-conscious and effective patient care
   d. Develop skills as a “team leader”
   e. Develop skills (administrative or otherwise) to organize and lead a busy clinical service

IV. ORGANIZATIONAL STRUCTURE AND INSTITUTIONS

The UCSD Surgical Critical Care Program is developed with the surgical intensive care unit as the primary area of focus. The rotation schedule includes alternating one-month blocks in which the fellow will have consulting responsibility for the patients admitted to the surgical intensive care unit that are not on the trauma service or those that are part of the trauma service and resuscitation room. It is expected that the fellow on the SICU/Critical Care Service will round daily with each team in the morning along with the general surgery residents and the anesthesia residents on the rotation, and use this opportunity to create the plans of care for each
A similar process will occur on the trauma service and, in addition, the fellow will participate on an every fourth to fifth day basis on supervising and initiating resuscitations of trauma patients as the fellow comes through the surgical intensive care unit based resuscitation room when the fellow is on call and participates in anything required for acute stabilization. The fellow is specifically not to become involved in elective surgical procedures except with great exception.

The rotation schedule for the year will alternate back and forth between these two services and each of these services will be the focus from which the fellow interacts directly with all other components of the educational program. Rounds on either of these services will be conducted by a faculty member and group and one-on-one interaction will occur on a daily basis. The fellow’s responsibility will be to become knowledgeable about essentially every patient on that service and be prepared to have a plan of care for each of these patients.

</table>

Each of these conferences has a unique perspective and is integrated to either provide either an administrative experience, a quality assurance component, or a specific didactic goal and objective. The integration of these into the overall goals and objectives of the program are outlined in detail and the conferences outlined above give you the daily sequence to make this compatible with a weekly schedule. They are designed to be scattered throughout the week so as to not encumber any one particular day and should allow plenty of time for patient care in addition to personal study. The details of the critical care conferences and the critical care journal club are in Section II Goals and Objectives.
VI. DECISION MAKING AUTHORITY/SUPERVISION POLICY

The fellow will initially be given responsibility commensurate with experience and aptitude. As the resident matures, clinical responsibility will also increase. The resident will be responsible for daily rounds in the SICU and responsible to participate and oversee the care of patients and supervise the general surgery residents and medical students in this setting. The fellow will participate in management decisions with the aid and supervision from critical care attending staff. The fellow will also interact with attending staff from other primary surgical services in reaching clinical strategies and management decisions in a collaborative process which teaches the elements of working in an open unit. The fellow is responsible for writing orders, assessing patients, performing procedures, and integrating the care on either of the two rotations.

The SICU is an open unit and the ultimate clinical responsibility lies with the admitting surgical attending. Operationally, this responsibility is delegated to a degree depending on the given faculty member to the SICU team. The fellow will be expected to fill the role as the situation dictates ranging from senior consultant to primary decision maker under the supervision and guidance of the attending SICU staff.

A. Relation to Faculty:

Relation to faculty and the fellow will essentially always be one-on-one with direct supervision by an individual faculty member assuming responsibility for each and every patient and each and every care decision or procedure. Faculty will be kept informed at all times of any major changes, and as such, will assume responsibility along with the fellow for any problems in relation to the general surgery residents. The fellow is to work directly with the general surgery residents in a supervisory capacity and have the expectation to not only supervise, but teach and educate residents at the junior levels. With regard to the chief resident and the trauma surgery service and other general surgery services, fellows are to have a collaborative and complimentary interaction, but are to never have direct responsibility for the same patients. When a patient is in the SICU, the general surgery resident on any service maintains control of the patient and the surgical critical care fellow provides a consulting and collaborative relationship. With regard to patients in the resuscitation room, the surgical critical care fellow is responsible for patients on the night and day that the fellow is on call, but otherwise the general surgery residents are responsible during their days on call with the appropriate attending.

B. Relation to Residents:

The critical care fellow will function as a junior faculty member in that the program has accepted only board eligible general surgery trainees into this residency. The critical care fellow will have supervisory responsibility over general surgery residents and anesthesia residents on assignment in the SICU. Interaction with the surgical critical care unit attending staff will be one-on-one and the critical care fellow will be responsible to make rounds on a daily basis with the attending. In addition, the critical care fellow will develop individual relationships with each attending on the surgical staff and each resident group in the local general surgery training program and work directly
with each specific attending and resident group who has patients in the SICU. This includes general surgery attendings, transplant attendings, neurosurgery attendings, cardiothoracic attendings, and any other attendings having patients present. The critical care fellow and the assigned SICU general surgery residents make rounds with these primary teams and participate in the decision making and provision of care. Most policies and procedures are generated within the intensive care unit environment by input from all practitioners through a multidisciplinary SICU users group in which the critical care fellow participates. Through this process, policies and procedures are reviewed and modified. The attending staff will provide supervision and more senior guidance as well as teaching in both clinical and didactic sessions.

C. Relation to Medical Students:

The critical care fellow has a responsibility to the medical students to not only supervise them and make sure that anything they are involved in with patients is supervised, they also have a responsibility to teach the medical students and provide impromptu continuous teaching opportunities directly related to specific patients. The critical care fellow will also be asked to provide informal evaluation of medical students rotating in the SICU under their supervision, so a final evaluation done by the Critical Care attending is consistent with the overall evaluation of the team.

VII. FELLOW DUTY HOURS AND WORKING ENVIRONMENT POLICY

A. Work Standards

The standard work schedule for the fellow shall be 8:00 a.m. – 5:00 p.m.

The fellow shall accrue vacation at the official rate of 13.33 hours per month. This provides a total of 20 vacation “working days” per year.

Vacation leave shall be requested by the fellow in writing in advance on a “UCSD Departmental Approval of Absence Form” and scheduled with the agreement of the Program Director.

B. Duty Hours

Duty hours are limited to 80-hours per week averaged over a 4-week period. A template was designed to clearly explain to all members of the Critical Care Service (attendings and critical care fellows) when and at what time the fellow should start their daily activities, as well as when they should leave the hospital post call and days off.

The duty hours will be in accordance with the UCSD and ACGME Housestaff Duty Hours and Working Environment Policies/Procedures. (Please refer to Appendix III.)
C. Monitoring of Duty Hours

Fellows and faculty will be provided copies of the rules pertaining to ACGME requirements for limited fellow duty hours. These rules will be discussed in a divisional meeting in which faculty and fellows attend. Minutes will be kept of this meeting.

Each month, fellows will be asked to complete a survey assessing fellow work hours and fatigue. The results of these surveys will be evaluated by the Program Director on a regular basis to assure compliance with ACGME resident duty hour requirements.

In addition, the program director meets on a biweekly basis with the fellow one-on-one to specifically address working hours, fatigue, any particular problems, and the goals and expectations of the rotation.

D. On-Call Activities

Call is “in-house” call. Fellows will be on call every fourth to fifth night (seven times per month-occasionally less) and will go home on the following day by noon; when they are on the trauma rotation, they are usually around until about 5:00 pm and when they are on the critical care rotation they can regularly leave in the early afternoon most days.

Fellows will keep track of hours on call on a monthly basis. They will follow their progress and when they are over, they will report it to the program director.

Through the scheduling process, fellows will be guaranteed at least one weekend per month off and at least one complete day out of seven relieved of all clinical responsibilities. Should this for some reason not occur, please notify me.

Sample Schedule:

D. Moonlighting

Fellows in the Surgical Critical Care training program are not allowed to moonlight.
E. Support Services

Sleeping quarters and greens are available through the hospital service and a library service through the office of Dr. Coimbra. Also, online access to a great number of scientific journals is available to each fellow in their offices through the UCSD website digital library. A full function cafeteria is open during hospital hours and available to house staff during this time.

F. Pay

Salary will be $59,451 per year. In addition, office supplies and equipment needs will be paid for by the division. The division will also sponsor a fellow to participate in one educational conference per year, not to exceed $1,000 per year.

G. Duty Hours Exception

Fellows will be allowed to exceed the 80-hour limit only for educational purposes and if they document why they stayed (i.e. special case, conference, or need to provide patient continuity). This will not exceed 10% or 8 hours per week, on average. In the event of being over, they will make it up subsequently to stay in compliance with the average overall.

If called back in, they will count the hours they are in the hospital toward the 80-hour week.

For further information on the Working Environment Policy please refer to the UCSD Housestaff Working Conditions Policy (Appendix III).

VIII. SCHOLARLY ENVIRONMENT

The faculty is committed to maintenance of a scholarly environment including multiple specific activities.

The process of evidence-based guideline development will be undertaken. This will be done through business meetings and clinical research activities to maintain and create exposure to this important process. Active research is available in several areas and an elective second year can be chosen to pursue research on a more full-time basis. During the year of the clinical fellowship, research will be primarily limited to retrospective clinical research for participation in ongoing clinical activities. All critical care faculty are actively involved in research related to critical care, either basic science or clinical care. In addition, opportunity exists within the department for an interested fellow to pursue research in epidemiology or public health issues and outcomes research. All fellows are encouraged to develop clinical projects under the supervision of clinical staff and an optional year exists to pursue specific bench research. It is expected that fellows with a strong research interest will plan to spend an additional optional year and the second year is extremely flexible to accommodate these interests.

There are excellent facilities for research in a number of areas. The intensive care unit is modern with full instrumentation and highly computerized. We have been actively involved in
clinical trials for several years and the personnel, including nursing staff, and know-how are in place and allow the fellow to be complimentary to this process rather than central. Active prospective trials include evaluation of selectin levels in trauma patients, evaluation of anti white cell monoclonal antibodies, evaluation of stroma free hemoglobin, the evaluation of noninvasive measurement of intracranial pressure, the evaluation of enteral feeding with immune enhanced diets, the evaluation of anti-PAF antagonists, the evaluation of topical surfactant in ARDS. In addition, the use of a continuous on-line computer system makes available the opportunity to do signal processing research.

The faculty also has strong basic science research interests involving many areas, particularly in immunology and the effects of critical illness on immunology. This is funded by both public and private sources. The current investigations include the isolation of immunosuppressive peptides from critically ill patients, the evaluation of expression of cytokines in animal models, the evaluation of hypertonic saline and its effect on immune function, both systemically and on individual cellular functioning, the evaluation of intracellular signaling by extracellular sodium, and the evaluation of digital signal processing of physiologic wave form analysis as mentioned above. In addition to this, basic science interaction with Scripps Institute and Salk Institute of Immunology are available.

In addition to this, the division has an active epidemiologic research effort including NIH funded evaluation of critically ill patients following injury. The division maintains a large computerized database containing physiologic data on patients in the SICU and a large database of injured patients which provide strong opportunities for retrospective research. In addition, the advanced statistical and analytical expertise is available in-house.

We have never maintained a specific research requirement for fellows in that the clinical demands of a busy initial year are substantial. Previous fellows have been involved in clinical investigation including the initiation of clinical studies, but it has not been a requirement.

An extensive library is located in the program director’s office and available to the critical care fellows on a sign out basis. An on-line service to national libraries is available to each fellow through their computer. In addition, a major library exists in La Jolla for more extended research. Copying availability is available within the offices of the division on a reasonable basis.

To assist the fellows in oral presentations and scholarly presentations or any manuscripts, reasonable secretarial support and photographic needs will be met. On average, it is expected that a presentation will not exceed $50 for photographic requirements. Manuscript preparation, when appropriate, should be requested through the program director and he will assure that appropriate secretarial support to get manuscripts typed, etc. will be accomplished. In addition, editorial assistance is available on an ad hoc basis through an editorial assistant used by the division.

The final component of scholarly environment includes a full time epidemiologist and statistician who is part of the department and available to help the fellows with any research needs.
IX. EVALUATION METHODOLOGY

A. Evaluation of the Fellow by Faculty

The fellow will be required to maintain a case log of all operative procedures. In addition, the fellow will be provided case logs of their critical care experience in the surgical intensive care unit and their resuscitation experience. This will allow the fellow to review and maintain an active understanding of their experience and adjust during the year for any inadequacies. In addition, this will allow the program director to assure that operative experience does not exceed the rules of the RRC. Lastly, each fellow is to develop a Critical Care Index Case (CCIC) log of at least twenty patients who best represent the full breadth of critical care management. At least two out of the seven categories that follow should be applicable to each chosen patient. The completed CCIC log should include experience, with at least one patient, in all seven of the following essential categories: ventilatory management, bleeding (non-trauma) greater than 3 units, hemodynamic instability, organ dysfunction/failure, dysrhythmias, invasive line management/monitoring, and nutrition.

Due to the close ratio of faculty to fellows, evaluation of each fellow occurs on a contemporaneous ongoing daily basis through feedback and personal interaction between the fellows and the faculty. In addition, a formal performance evaluation of the fellow by the faculty is completed every six months covering the domains of clinical care, research and administrative components (see pages 22-23). Lastly, a final (summative) evaluation is completed by the Faculty during the final period of the fellowship verifying that the fellow has demonstrated sufficient competence to enter practice without direct supervision.

The fellows will also be evaluated by the trauma program manager, trauma nurse practitioners, and students semiannually. They will also be encouraged to undergo a self-evaluation process on their own.

B. Evaluation of the Faculty and Program by Fellow

The fellows will be expected to evaluate the faculty using standardized forms on a semiannual basis (see page 24). The fellows will also be expected to evaluate the program annually using a standardized form (see page 25-26).

The fellows will also be encouraged and asked to participate in the Q 6-month evaluation of the core objectives and goals by providing feedback as to how to modify the program on an ongoing basis. This is covered through other evaluation methods such as active discussions with the fellows during our weekly Divisional Meeting and Journal Club Meeting. Fellows are encouraged to discuss any issues or concerns regarding the residency program, their progress in the residency, and the correction of any identified problems.
Before the completion of the training period, fellows are asked to write a letter to the program director about their overall assessment of the program. The content is then shared with the core faculty in a divisional/faculty meeting.

The feedback received by fellows is used to improve the educational program and the curriculum is updated in the handbook as needed.
DIVISION OF TRAUMA
SURGICAL CRITICAL CARE FELLOWSHIP PROGRAM
FELLOW EVALUATION
Evaluator: Subject:

Please evaluate performance of above fellow based on the current core competencies described below.

**PATIENT CARE**

Please consider:
- Communication skills with patients, family and colleagues
- Attention to detail
- Participation in team decision making
- Leadership/mentoring senior and junior residents regarding patient care issues

<table>
<thead>
<tr>
<th>Lowest</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>Highest</th>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**MEDICAL KNOWLEDGE**

Please consider:
- Ability to integrate basic science concepts into clinical practice
- Up-to-date with recent scientific discoveries/developments in the specialty
- Organized thinking
- Ability to teach
- Quality of presentations

<table>
<thead>
<tr>
<th>Lowest</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>Highest</th>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**CLINICAL PERFORMANCE**

Please consider:
- Management of critical issues in trauma and SICU
- Technical abilities; procedures in the SICU
- Technical abilities; surgical procedures
- Ability to multitask

<table>
<thead>
<tr>
<th>Lowest</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>Highest</th>
<th>N/A</th>
</tr>
</thead>
<tbody>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**PROFESSIONALISM/INTERPERSONAL SKILLS**

Please consider:
- Respect and integrity in work environment
- Demonstrates compassion to patients and families
- Ability to listen to others and respect people with different opinions and/or background
- Relates to others in a cordial, respectful manner
- Works effectively with others
- Committed to the ethical principles of the profession
- Is eminently educable
- Ability to accept criticism

<table>
<thead>
<tr>
<th>Lowest</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>

<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**PRACTICE-BASED LEARNING**

Please consider:
- Analyses own clinical practice and improve it
- Locates and applies scientific evidence to patient care
- Understands formulation of hypothesis, study design and statistical methods
- Facile with scientific and medical tools available in the internet
- Teaching abilities

<table>
<thead>
<tr>
<th>Lowest</th>

X. QUALITY ASSURANCE

The division has a number of programs for quality assurance and performance improvement and members of the division have been national leaders in the development of programs in critical care and trauma. Maintenance of performance improvement will occur through daily rounds, the SICU users group, data collected by each of the paramedical services, and data collected on all patients through each surgical service.

Complications and deaths are presented at Wednesday morning Morbidity and Mortality conference and patient group specific complication trending is reviewed on a regular basis. Specific trends relative to ventilator use, nutritional use, compliance with the pharmacy guidelines (antibiotics and paralysis drugs) drug reactions, blood use, and a number of other disease specific complications that are reviewed on a monthly basis. The critical care fellow will be exposed to all these techniques and participate specifically in the presentation of cases, the review of problems as they occur, and the development of performance improvement solutions.

All injured patients undergo autopsy and most other patients dying in the SICU will undergo autopsy and autopsy findings will be correlated through the quality improvement process. An expedited medical record system and abstracted information on a computerized registry along with reports designed specifically to support the quality assurance process are formatted to assist you in learning this process.

XI. ELIGIBILITY, RECRUITMENT, SELECTION NONDISCRIMINATION, PROMOTION, EVALUATION AND DISMISSAL PROCESS

Our policies and practices are contained in the institutionally developed document called the UCSD Policy on Eligibility, Selection, Nondiscrimination, Promotion, Evaluation and Dismissal of Housestaff in ACGME Accredited Graduate Medical Education Training Programs. Please refer to Appendix III.

A. Fellow Eligibility. Applicants with one of the following qualifications are eligible for appointment to the UCSD Surgical Critical Care Residency:

1. Graduates of medical schools in the United States and Canada accredited by the Liaison Committee on Medical Education (LCME.)

2. Graduates of colleges of osteopathic medicine in the United States accredited by the American Osteopathic Association (AOA).

3. Graduates of medical schools outside the United States and Canada who meet one of the following qualifications.

   a) Have received a currently valid certificate from the Educational Commission for Foreign Medical Graduates and are in compliance with the license requirements of the State of California.
b) Have a full and unrestricted license to practice medicine in a U.S. licensing jurisdiction.

4. Graduates of medical schools located outside the United States who have completed a Fifth Pathway program provided by a LCME-accredited medical school will be in compliance with the license requirements of the State of California.

B. Recruitment Process

The recruitment process starts by posting an advertisement to science journals. Fellows then apply by completing an application and sending it along with three references to the Program Director.

Based on an initial screening, candidates are invited for one day to meet faculty and other key personnel.

The program has participated in the Surgical Critical Care Match and the program director reserves the right to define the number of spots that will be made available to the match, 1 or 2, as well as to hire fellows off match within the quota (2 for instance) accredited by the ACGME.

C. Fellow Selection

UCSD selects from among eligible applicants on the basis of their preparedness, ability, aptitude, academic credentials, communication skills, and personal qualities such as motivation and integrity. The UCSD Surgical Critical Care Program does not discriminate with regard to sex, race, age, religion, color, national origin, disability, or veteran status.

D. Enrollment of Noneligibles

UCSD will not appoint noneligible individuals.

XII. GRIEVANCE PROCEDURES

Should a fellow have a specific grievance, he/she is encouraged to use the office of Graduate Medical Education to assist with this process and follow a procedure. At our institution, our policy is the institutionally developed policy for corrective action/discipline hearing and appeal which is contained in our House Officer Policy and Procedure Document (HOPPD). Please refer to Appendix III.

XIII. MONITORING STRESS AND FATIGUE

Given the stressfulness and complexity of working with critically ill or highly injured patients, the monitoring of stress and fatigue and the attention to its signs and symptoms is an important priority for the Division of Trauma. Any indication that fellows are physically, psychologically, or personally stressed and/or fatigued will be immediately identified, the
fellow will be relieved of all clinical duties, and the faculty will assume all responsibilities of
the fellow until this problem can be dealt with. During the evaluation process, the program
director will ask the fellows about stress and fatigue. In addition, as part of the Core
Curriculum Lecture Series, there is a lecture on Physician Well Being and Impairment. Any
fellow seeing a colleague or feeling personally fatigued and/or in a stressful situation is asked to
identify this immediately to the program director or to other faculty members so that this can be
identified.

XIV. ADDITIONAL PROGRAM INFORMATION AND STATISTICS

A. SCCM In-Training Examination

In 1998 fellows began participating in the SCCM In-Training Examination process. Fellows are requested to take this examination and the cost of this will be provided by the program.

B. Board Certification Rates

To date, all critical care fellows have passed the American Board of Surgery Certifying Exam for Surgical Critical Care.

In addition, the residency has undergone three internal reviews by the Graduate Medical Education Committee of the School of Medicine, UCSD, and no deficiencies have been cited.

C. Career Paths of Graduates

Approximately fifty percent of all graduates are currently employed at academic institutions.

Appendix I (continued)

Resident Core Lecture Series

(Sampling of monthly topics covered during the year)

The Role of Residents as Teachers
Sleep Loss and Fatigue
DRG Assurance at UCSD Medical Center
Infection Control (IC) and Blood Borne Pathogens (BBP)
Tough Choices: End of Life Decision-Making
Patient Safety and Medical Errors
Lessons in Physician Well-Being
General Emergency Preparedness for Healthcare Providers
Preventing & Reporting Patient Injuries
Keeping out of Hot Water:  Laws and Principles Governing Medical Practice
New Privacy Laws
Burnout and Resilience in Physicians
Medical Education and the Pharmaceutical Industry
Appendix II

Required Readings

1. Surgical Critical Care Syllabus
2. Journal Club Readings
3. Selected Assigned Articles

Suggested Readings

1. Scientific American

Dr. Coimbra has over 60 textbooks of critical care available to the fellows to be used as needed.

STATEMENT OF COMMITMENT TO GRADUATE MEDICAL EDUCATION

The University of California, San Diego School of Medicine and Medical Center are committed to graduate medical education (GME) as a central component of their mission to improve the health of the public. UCSD seeks to educate outstanding physicians and medical scientists. Investing in graduate medical education assures that current residents and future generations of health care professionals are prepared for California’s and the nation’s evolving health care needs. In this context UCSD Healthcare is committed to providing the necessary educational, financial and human resources required to assure excellence throughout the continuum of graduate medical education.

The School of Medicine and the Medical Center provide a supportive and challenging educational environment within which residents of diverse backgrounds can prepare themselves for careers characterized by commitment to excellence in service to others through patient care, research, teaching, and lifelong learning. Faculty members offer residents state-of-the-art knowledge, demonstrate the latest developments in patient care, model compassionate and ethical care, and provide guidance and supervision to ensure patient health and safety.

UCSD School of Medicine and Medical Center furnish a financially secure and educationally enriched environment for organized GME programs in which resident physicians develop personal, ethical, clinical and professional competence under careful guidance and supervision. Programs will assure the safe and appropriate care of patients, and the progression of resident physician responsibility consistent with each physician’s clinical experience, knowledge and skill.

The graduate medical education program is designed to provide residents with the knowledge, skills and attitudes that serve as the basis for competent and compassionate clinical practice, scholarly research and public service. Residents are encouraged to develop the capacity for self-evaluation and moral reflection to sustain a lifetime of responsible and committed practice of medicine. The educational program prepares residents to continue their own education and to teach their patients and colleagues throughout their working years. UCSD’s GME Programs are committed to ensuring that trainees understand the scientific foundation of medicine, apply that knowledge to clinical practice, and extend that knowledge through scholarly research. In addition, GME Programs provide the experience necessary for residents to master the clinical skills needed to evaluate and care for their patients.

UCSD School of Medicine offers opportunities for collaboration with colleagues throughout the School of Medicine and its basic sciences departments. Such an environment offers a broad array of educational opportunities in graduate medical education. This includes great diversity in patient populations, specialty services, technological resources and educational programs.
While each residency program is designed to meet the unique requirements of the specialty, including the achievement of the ACGME-defined general competencies, UCSD is responsible for ensuring a safe and supportive learning environment for all residents. The Graduate Medical Education Committee (GMEC) establishes educational policy, monitors resident working conditions, reviews affiliation agreements, conducts internal reviews of each program, develops cross-residency educational programs and serves as an advocate for residents. The Associate Dean for Graduate Medical Education-DIO, directs the Office of Graduate Medical Education and, together with GMEC ensures that each of the graduate medical education programs meets or exceeds all Institutional and Program Requirements promulgated by the Accreditation Council for Graduate Medical Education (ACGME) and its individual Residency Review Committees (RRC’s).

**PURPOSE OF HOUSE OFFICER POLICY AND PROCEDURE DOCUMENT**

The purpose of this document is to provide a statement of UCSD policy applicable to all House Officers (Housestaff) at UCSD who have received the degree Doctor of Medicine, Osteopathic Medicine or an equivalent degree and have been accepted into an organized program of the University for the purpose of obtaining (a) the advanced education and/or training leading to eligibility for licensure or recognition in a specialty or subspecialty field in one of the health professions; or (b) post-doctoral preparation for an academic career in a clinical field. To the extent possible, the University shall uniformly and equitably apply the published policies and standards affecting the Housestaff.

For purposes of these policies and procedures, House Officers shall include interns, residents, and clinical fellows.

**HOUSESTAFF RESPONSIBILITIES - POSITION DESCRIPTION**

The goal of a graduate medical education training program is to (a) provide trainees (interns, residents, and fellows) with an extensive experience in the art and science of medicine in order to achieve excellence in the diagnosis, care and treatment of patients and (b) when applicable, to
establish trainee’s eligibility to participate in the relevant ABMS Specialty Board examination. To achieve this goal, the trainee agrees to do the following:

1. Develop and participate in a personal program of self-study and professional growth with guidance from the Medical School’s teaching staff.

2. Under the supervision of the Medical School’s teaching staff, participate in safe, effective and compassionate patient care, consistent with the trainee’s level of education and experience.

3. Participate fully in the educational activities of the residency/fellowship program and assume responsibility for participation in the teaching of more junior physicians, of medical students and of students in allied health professions.

4. Participate in institutional programs and activities involving the medical staff and adhere to established practices, procedures and policies of the institution.

5. Participate in the standing committees of the Medical Staff and institutional committees, as assigned by the Program Director, especially those that relate to patient care review activities.

6. Develop an understanding of ethical, socioeconomic and medical/legal issues that affect graduate medical education and the practice of medicine. Learn cost containment measures in the provision of patient care.

7. Perform all duties in accordance with the established practices, procedures and policies of the institution, its programs, clinical departments and other institutions to which the resident/fellow is assigned.

8. Adhere to the moonlighting policies of UCSD and to the program in which the resident/fellow is appointed.

9. Comply with the duty hour and working condition policies of UCSD and the program in which the resident/fellow is appointed. This includes, in part, completion of surveys or data entry into GME database management systems as required by the training program, the Medical Center and the ACGME.

10. Adhere to the program’s call schedule and schedule of assignment.

11. Document patient care in the medical record in a timely fashion as per Medical Staff policy.

12. Adhere to the ACGME Institutional Requirements and to the ACGME-RRC Program Requirements for the specialty in which the resident/fellow is in training.

13. Participate in the evaluation of the training program and its faculty.

15. Comply with UCSD House Officer eligibility criteria as well as specific/special requirements of Affiliated Institutions to which trainee may rotate as part of his/her training. These requirements may include, but are not limited to, criminal background checks, substance abuse testing, health screenings, providing additional paperwork/information, etc.

16. Adhere to the policies defined in the UCSDMC document entitled, Guidelines for Managing Impaired Residents and the UCSD House Officer Policy and Procedure Document.

17. Adhere to UCSD Office of Graduate Medical Education Resident Use of Email Policy, and the UCSD Electronic Communications Policy and Procedures.
ELIGIBILITY – SELECTION - NONDISCRIMINATION

ELIGIBILITY CRITERIA

Applicants for appointment to the graduate medical education training programs sponsored by UCSD must meet the following criteria:

- Graduate of a medical school located in the United States or Canada, accredited by the Liaison Committee on Medical Education (LCME); or
- Graduate of a college of osteopathic medicine in the United States accredited by the American Osteopathic Association (AOA); or
- Graduate of an international medical school located outside of the United States and Canada who meets the following qualifications:
  - Holds a current, valid certificate issued by the Educational Commission for Foreign Medical Graduates; and
  - Holds a full and unrestricted license in the State of California to practice medicine or has received written notification from the Medical Board of California of approval to commence training in an accredited program in this State; or
- Graduate of a medical school located outside of the United States who has completed a Fifth Pathway program provided by an LCME-accredited medical school, and who provides evidence of compliance with the licensure laws of the State of California or holds a full and unrestricted license from the State of California.
- All applicants hired by UCSD will be required to provide and undergo the following procedures:
  - Provide proof of United States citizenship or eligibility/authorization to work in the United States;
  - Complete a full verification and criminal background screen.

SELECTION

Programs should select from among eligible applicants on the basis of their preparedness and ability to benefit from the program in which they are appointed. Aptitude, academic credentials, personal characteristics and ability to communicate should be considered in the selection.

NON DISCRIMINATION

The University of California prohibits discrimination against or harassment of any person employed by or seeking employment with the University on the basis of race, color, national origin, religion, sex, gender identity, pregnancy, physical or mental disability, medical condition (cancer-related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services (as defined by the Uniformed Service Employment and Reemployment Rights Act of 1994).
University policy also prohibits retaliation against any employee or person seeking employment for bringing a complaint of discrimination or harassment pursuant to this policy, or against a person who assists someone with a complaint of discrimination or harassment, or who participates in any manner in an investigation or resolution of a complaint of discrimination or harassment.

The University of California is an affirmative action/equal opportunity employer. The University undertakes affirmative action to assure equal employment opportunity to minorities and women, for persons with disabilities, and for covered veterans.

SEXUAL HARASSMENT POLICY

The University of California is committed to creating and maintaining a community in which all persons who participate in University programs and activities can work together in an atmosphere free of all forms of harassment, exploitation or intimidation, including sexual. Specifically, every member of the University community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy. It is the intention of the University to take whatever action may be needed to prevent, correct and, if necessary, discipline behavior which violates this policy. This statement is abstracted from the UCSD Sexual Harassment and Complaint Policy PPM Section 200-10. The policy may be obtained from the Office of Sexual Harassment Prevention and Policy or from the Office of Graduate Medical Education.

TITLES AND LEVELS

INITIAL APPOINTMENT

Each House Officer is appointed to a Resident Physician title with a duration period of not more than one (1) year. Titles for House Officer appointments are Resident Physician I through IX and Chief Resident Physician.

Appointments to the Resident Physician Series are made by the Associate Dean for Graduate Medical Education upon nomination by the Program Director based on the number of years of training accepted by the board in the particular specialty or subspecialty. House Officers must be graduates in medicine or osteopathic medicine or hold an equivalent degree, and must be licensed to practice medicine in the State of California by the end of their first 24 months of postdoctoral training, or as otherwise prescribed by law. Individual appointments are made on an annual basis.

Typically, a first-year resident enters at level one and progresses a step on each anniversary of appointment until the conclusion of the training program. Credit for previous training (i.e., advanced standing) is a matter for discussion between the House Officer, the Program Director and the Specialty Board. A stipend for service as Chief Resident is afforded in addition to the salary when so indicated by the Program Director.

REAPPOINTMENT/PROMOTION

Reappointment to a Resident Physician position for subsequent year is not automatic and is subject to annual review and contingent upon mutual agreement, funding availability, and satisfactory performance. Reappointment shall be recommended by the Training Program Director and approved by the Associate Dean of Graduate Medical Education.

Reappointment to a subsequent year shall be for one-year term.
CHIEF RESIDENTS

Appointments are made for not more than one year by the Associate Dean for Graduate Medical Education after nomination by the Program Director. Chief residents must be graduates in medicine, osteopathic medicine or hold an equivalent degree with service of one or more years in the graduate medical education program in an approved hospital or equivalent training, and must hold a medical license in the State of California. This does not apply to Chiefs in Internal Medicine or Pediatrics.

SALARY - RATES

The basic salary scales for House Officers are established by the University Office of the President. At UCSD Medical Center salaries for represented Housestaff are collectively bargained by UCSD and the San Diego Housestaff Association.

UCSD HOUSESTAFF DUTY HOURS AND WORKING ENVIRONMENT POLICY

DUTY HOURS

Duty hours are defined as all clinical and academic activities related to the training program, i.e., patient care, administrative duties related to patient care, the provision for transfer of patient care, time spent in-House during call activities and scheduled academic activities such as conferences. Duty hours do not include reading and preparation time spent away from the duty site. Each program shall adopt the duty hour policies for their specialty as defined in the ACGME Institutional and Program Requirements. In the absence of more stringent ACGME-RRC requirements, the following specific duty hours for House Officers at ACGME programs shall be maintained unless exceptions have been granted in accordance with the procedures defined below.

UCSD assures an educational environment in which House Officers may raise and resolve issues without fear of intimidation or retaliation by administration, faculty and/or staff. (Refer to Section entitled, Educational Environment Conducive to Open Exchange of Issues.)

A. Duty Hours

1. Duty hours shall be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-House call activities. When a House Officer on off-site, on-call duty must return to the hospital, such time in the hospital shall be included in the 80 hour limit.

2. Each House Officer shall have one day off in seven days averaged over no more than four weeks. One day off is defined as one continuous 24-hour period free from all clinical, educational, and administrative activities. Particular attention should be paid to individual Residency Review Committee program requirements in the event the “one day in seven” is to be averaged over a shorter period, such as over as little as seven days.

3. Each House Officer shall have an adequate time for rest and personal activities. This shall consist of a 10 hour time period provided between all daily scheduled duty periods and after in-House call.
B. **On-Call Activities**

1. In-House call shall occur no more frequently than every third night, averaged over a four-week period.

2. Continuous on-site duty, including in-House call, must not exceed 24 consecutive hours. House Officers may remain on duty for up to 6 additional hours to participate in didactic activities, transfer care of patients, conduct outpatient clinics and maintain continuity of medical and surgical care. Each program must consult with their individual RRC because further limitations may be imposed.

3. No new patients may be accepted after 24 continuous hours on duty. A new patient is defined as any patient for whom the resident has not previously provided care. Exceptions will be elaborated in individual RRC program requirements. Programs must consult their individual RRC for clarification.

4. At-home call (pager call) is defined as call taken from outside the assigned institution.
   a) The frequency of at-home call is not subject to the every third night limitation. However, at-home call must not be so frequent as to preclude rest and reasonable personal time for each resident. House Officers taking at-home call must be provided with 1 day in 7 completely free from all educational and clinical responsibilities, averaged over a 4-week period.
   b) When House Officers are called into the hospital from home, the hours House Officers spend in-House must be counted toward the 80-hour limit.
   c) The training program director must monitor the demands of at-home call and make scheduling adjustments as necessary to mitigate excessive service demands and/or fatigue.

C. **Moonlighting**

1. As identified by the ACGME, residency education is a full-time endeavor. As such, each program director must ensure that moonlighting does not interfere with the ability of the resident to achieve the goals and objectives of the training program.

2. Residents and Fellows may be given the opportunity to provide extra service for additional compensation at UCSD. This service that occurs within the training program sponsoring institution, termed, "Extra Pay for Extra Work," shall be counted toward the 80 hour weekly limit on duty hours.

D. **Supervisory Back-up**

Appropriate faculty and/or supervisory resident backup will be provided for every House Officer for consultation, education and supervision.

E. **House Officer Fatigue**

Faculty and residents shall be educated to recognize the signs of fatigue. Policies and procedures shall be developed to prevent and counteract the potential negative effects of fatigue.

GRIEVANCE

1. Each program’s policies and procedures shall include grievance procedures in relation to duty hours within the program.
2. Overall, House Officers may bring forward issues regarding duty hours to their training program director, chief resident, department chair, the Associate Dean for Graduate Medical Education and the Chair of Graduate Medical Education Committee.

3. Additionally, any trainee may bring his/her concerns regarding duty hour implementation directly to the Campus Ombudsperson, UCSD Office of the Ombud, who can be reached at (858) 534-0777. Such interaction is held in strict confidence. The Campus Ombudsperson will report to the Chair, GMEC who will investigate the circumstances and initiate an appropriate resolution.

4. Represented House Officers may refer to the Resident Duty Hours section of the SDHSA Memorandum of Understanding.

**WORKING ENVIRONMENT**

1. In-House sleep and rest space and bathroom facilities shall provide security and privacy. The Office of Graduate Medical Education will work closely with the Housestaff to identify and address, as appropriate, personal service issues.

2. Continuing efforts shall be made to upgrade ancillary support services and, in particular, to minimize the provision of services by House Officers that could be provided with no diminution in quality by other personnel.

3. Representative House Officers may refer to the Working Environment section of the SDHSA Memorandum of Understanding.

---

**HOLIDAYS**

- The University holidays are as follows:
  
<table>
<thead>
<tr>
<th>Holiday</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>New Year’s Day</td>
<td>November 1 (Veterans’ Day)</td>
</tr>
<tr>
<td>Third Monday in January</td>
<td>Thanksgiving Day</td>
</tr>
<tr>
<td>Third Monday in February</td>
<td>Friday following Thanksgiving Day</td>
</tr>
<tr>
<td>Last Monday in May</td>
<td>December 24 (or announced equivalent)</td>
</tr>
<tr>
<td>Independence Day</td>
<td>December 25</td>
</tr>
<tr>
<td>Labor Day</td>
<td>December 31 (or announced equivalent)</td>
</tr>
</tbody>
</table>

- Unless an alternate date is designated by the President, a holiday that falls on a Saturday is observed on the preceding Friday and a holiday that falls on a Sunday is observed on the following Monday.

- A House Officer may observe a special or religious holiday, provided that the work schedule permits and provided that the time off is charged to vacation or is without pay.

- Holiday call shall be distributed by the Training Program Director, or designee, equitably among House Officers at the same postgraduate level. The Program Director or designee may consider the following factors when scheduling holiday call: continuity of patient care, opportunity for unique educational experience, supervision or education of others or other special requirements of the House Officer’s particular level of training.

- House Officers receive holiday pay pursuant to University policies.
Represented House Officers may refer to the Holidays section of the SDHSA Memorandum of Understanding.

**LEAVE POLICY**

**VACATION**

- House Officers accrue vacation at the official rate of 13.33 hours per month. This provides a total of 20 vacation “working days” per year. Due to the complexities of rotation schedules for House Officers in various training programs, 28 calendar days or one calendar month will be given as leave depending upon the mode of scheduling of a given service. A part-time House Officer receives the proportionate amount, based on the percent and duration of the appointment.

- Vacation leave shall be requested by the House Officer in writing and scheduled with the agreement of the Program Director or his/her designee.

- Vacation may be scheduled in full or may be split depending upon the requirements of the training program and the written requests of the House Officer.

- To the extent allowed by the training requirements of the program, vacation leave will be granted in accordance with Housestaff requests.

- Changes in the leave schedule may be initiated by the Program Director when required by department activities. The Program Director shall endeavor to give advance notice of any change.

- House Officers wishing to make a change in the posted leave schedule must submit a written request. Approval of such requests is subject to the staffing requirements of the training program and the discretion of the Program Director or his/her designee.

- Leave must be taken during the period of appointment unless an exemption is granted to the department by the Associate Dean for Graduate Medical Education.

**PROFESSIONAL LEAVE**

- With the approval of the Training Program Director, House Officers may be granted up to five work days of leave with pay, per academic year, to pursue scholarly activities pursuant to their educational curriculum.

- Time not taken may not be carried over from one academic year to the next and will be forfeited.

**SICK LEAVE**

- House Officers shall accrue sick leave at the rate of 8 hours (one working day) per month, which is the equivalent of 12 working days per year. A part-time House Officer receives the proportionate amount, based on the percent and duration of the appointment.

- Each House Officer shall immediately notify his/her Training Program Director of any illness and, if requested by the Program Director, shall provide physician records to document illnesses lasting three or more days.

- Sick leave is not to be used as additional vacation.
• Sick leave that remains unused at the end of an appointment year will carry over to the following appointment year if the House Officer is reappointed. In the event the House Officer is not reappointed, unused sick leave will be forfeited.

• Sick leave not used beyond the predetermined date for separation is forfeited.

SICK LEAVE - FAMILY ILLNESS AND BEREAVEMENT

• Family Illness - A House Officer shall be permitted to use not more than 30 days of sick leave in any calendar year when required to be in attendance or to provide care because of the illness of the House Officer's spouse, parent, child, sibling, grandparent or grandchild. In-laws and step-relatives in the relationships listed also are covered. This provision also covers other related persons residing in the House Officer's Household.

• Family Bereavement - A House Officer shall be permitted to use not more than 5 days of sick leave when the House Officer's absence is required due to death of the House Officer's spouse, parent, child, sibling, grandparent or grandchild. In-laws and step-relatives in the relationships listed also are covered. This provision also covers other related persons residing in the House Officer's Household. In addition the House Officer shall be permitted to use not more than 5 days of sick leave in any calendar year for bereavement or funeral attendance due to the death of any other person. The House Officer shall provide prior notice to the Training Program Director as to the need for and likely length of any such absence.

PERSONAL LEAVE OF ABSENCE

• A House Officer may be granted a personal leave without pay when other leave balances have been exhausted, for the House Officer's convenience, but in granting the leave, the best interests of the training program shall be considered.

• Personal leaves may be granted for personal needs not otherwise specifically provided for by this policy.

• The Training Program Director may approve a personal leave for a period not in excess of six months. The Associate Dean for Graduate Medical Education may grant individual exceptions to the six-month limit.

PREGNANCY/CHILDBEARING DISABILITY LEAVE

• A House Officer disabled due to pregnancy, childbirth or related medical conditions shall be granted a medical leave of absence of up to four months, but not to exceed the period of verified disability.

Pregnancy disability leave may consist of leave without pay and/or paid leave such as accrued sick leave and accrued and/or advanced vacation leave.

• If a House Officer on an approved pregnancy disability leave is also eligible for family and medical leave, (noted below under Family and Medical Leave), up to 12 workweeks of pregnancy disability leave shall run concurrently with family and medical leave under Federal law.

• Upon termination of a pregnancy disability leave that runs concurrently with Federal family and medical leave, an eligible House Officer is also entitled to up to 12 workweeks of State family and medical leave.

• The aggregate of pregnancy disability leave and family and medical leave shall not exceed seven months from the onset of the disability.
A pregnant House Officer enrolled in the Housestaff disability plan should contact the Housestaff disability plan coordinator to discuss eligibility for coverage and the procedure to follow to obtain the disability benefit.

For House Officers disabled by pregnancy, childbearing or other related medical conditions who meet the eligibility requirements of the Family Medical Leave Act, the University shall continue its contribution for the House Officer’s health insurance benefits up to a maximum of 12 workweeks in a calendar year.

**PARENTAL LEAVE**

Parental Leave is a form of Family Care/Medical Leave to care for the House Officer’s newborn or a child placed with the House Officer for adoption or foster care. Such leave must be initiated and concluded within one year of the birth or placement of the child. The University shall grant a Parental leave subject to the provisions of Family Care Medical Leave Act (FMLA)/California Family Rights Act (CFRA). If requested and taken immediately following a Pregnancy Disability Leave, a House Officer eligible for FMLA/CFRA at the beginning of her Pregnancy Disability leave shall be granted the unused portion of FMLA/CFRA leave for Parental Leave purposes, up to a maximum of 12 workweeks. The amount available for use is determined by the amount which the House Officer has previously used under FMLA/CFRA in the leave year.

Parental Leave alone shall not exceed 12 workweeks within the leave year. However, when Parental Leave is combined with a leave for pregnancy-related and/or childbearing disability only, the total Family Care/Parental Leave shall not exceed seven months in the leave year.

**FAMILY AND MEDICAL LEAVE**

Family and Medical Leave (FMLA) is provided for an eligible House Officer’s serious health condition, the serious health condition of the House Officer’s child, spouse or parent, or to bond with the House Officer’s newborn, adopted or foster care child in accordance with State and Federal law in effect at the time the leave is granted.

- Leave granted for bonding purposes shall be concluded within 12 months following the child’s birth or placement for adoption or foster care.

A House Officer is entitled to up to 12 workweeks of FMLA leave during the 12 month calendar leave year, provided that:

- The House Officer has at least 12 cumulative months of University service (all prior University service shall be used to calculate the 12-month service requirement); and
- The House Officer has worked at least 1,250 actual hours during the 12 months immediately preceding the commencement date of the leave.

FMLA leave is unpaid leave, except under the following circumstances:

- Accrued/advanced vacation (for the specific academic year) may be used at the House Officer’s option before taking leave without pay.
- In addition, up to 30 days of accrued sick leave per year may be used as salary replacement for family illness leave.
- All paid time off used for Family and Medical Leave shall be deducted from the 12 workweek Family and Medical Leave maximum.

Advance Notice and Certification
Whenever possible, the House Officer shall provide at least 30 days advance notice. If 30 days notice is not practicable because of a medical emergency, for example, notice shall be given as soon as practicable. Failure to comply with these notice requirements may result in postponement of family and medical leave.

A House Officer who is granted leave for the House Officer’s own serious health condition shall be required to present medical certification prior to taking the leave and prior to returning to the training program.

Family and Medical Leave – Related to a Family Member’s Military Service

Eligible employees are entitled to Family and Medical Leave Act leave for purposes related to a covered family member’s military service. An unpaid FMLA leave may be taken for any one, or for a combination, of the following reasons:

- A “qualifying exigency” arising out of a covered family member’s active duty or call to active duty in support of a contingency plan, and/or
- To care for a covered family member who has incurred an injury or illness in the line of duty provided that such injury or illness may render the family member medically unfit to perform duties of the member’s office, grade, or rank.

A covered family member under the subsection includes a spouse, domestic partner, son, daughter, parent, or the next of kin of the employee. Next of kin is defined as the nearest blood relative to the service member.

When a requested leave is due to a “qualified exigency”, an eligible employee may take up to 12 workweeks of leave during any 12-month period.

When requested leave is taken to care for an injured or ill service member, an eligible employee may take up to 26 workweeks of leave during a single 12 month period to care for the service member. Leave care for an injured or ill service member, when combined with other FMLA-qualifying leave, may not exceed 26 weeks in a single 12 month period.

Effect on Benefits

A House Officer on family and medical leave shall be entitled to continue participation in health plan coverage (medical, dental and optical) as if on pay status for a period of up to 12 workweeks in a 12-month period. Contribution toward premium cost shall remain as it was prior to the onset of family and medical leave for a period of up to 12 workweeks in a calendar year.

LEAVE FOR WORK-INCURRED DISABILITY

A House Officer who is off pay status and receiving temporary disability payments under the Workers’ Compensation Act may be granted, at the discretion of the Training Program Director, a leave without pay for all or part of the period during which temporary disability payments are received, except that any leave without pay that is granted shall not extend beyond a predetermined date of separation.

Periods of leave for work-incurred disability run concurrently with Family and Medical Leave for a House Officer who is eligible for Family and Medical Leave.
MILITARY LEAVE

A House Officer granted temporary military leave for active-duty training or extended military leave is entitled to receive the House Officer's regular University pay for the first 30 calendar days of such leave in any one fiscal year, provided that the House Officer has completed 12 months of continuous University service immediately prior to the granting of the leave (all prior full-time military service shall be included in calculating this University service requirement) and provided that the aggregate of payments for temporary military leave, extended military leave and military leave for physical examination do not exceed 30 calendar days' pay in any one fiscal year.

A House Officer granted military leave with pay shall receive all benefits related to employment that are granted when a House Officer is on pay status.

JURY DUTY

- A House Officer who is summoned and serves on jury duty shall be granted leave with pay for the time spent on jury service and in related travel.
- Deferment or excused absence from jury service can only be granted by the court pursuant to the procedure outlined in the Jury Summons Notice.
- Make-up time may be required to meet the educational objectives and certification requirements of the training program and/or the American Specialty Board.

POLICY ON EFFECT OF LEAVE ON COMPLETION OF THE TRAINING PROGRAM

Make-up time may be required to meet the educational objectives and certification requirements of the training program and/or the American Specialty Board when a House Officer is required to utilize leave time as described herein.

The House Officer should discuss this issue with his/her Training program Director, if possible, prior to taking extended leave.

If extended leave results in the requirement for additional training in order to satisfy the program and/or American Specialty Board requirements, the pay status for the additional training time will be determined by the Training Program Director and the Associate Dean for Graduate Medical Education, if possible, prior to the approval of the leave.

BENEFITS AND DEDUCTIONS

HEALTH INSURANCE PACKAGE

House Officers are eligible for enrollment in the UCSD Housestaff health, dental, vision, life and disability insurance plans. The House Officer's spouse, dependent children and/or domestic same or opposite sex partner are also eligible for enrollment in the health, dental and visions plans.

For 2009-10 & 2010-11 there is no premium charge to the house officer for the cost of enrollment in health, dental and vision plans either for him/herself, for a spouse, dependent children or domestic same or opposite sex partner. There is no premium charge to the house officer for enrollment in either the life or disability plans.
Benefit coverage is not automatic. An enrollment process must be followed within the timeframes established by the carriers. Following the enrollment process, coverage is effective the date of the House Officer’s appointment to UCSDMC. Subsequently, new dependents may be enrolled provided enrollment occurs within 30 days after a qualifying event such as marriage, birth, or adoption.

Open enrollment for the Housestaff health plans (health, dental, vision and life) occurs on an annual basis during the month of June. At that time the House Officer will have the opportunity to change their medical plan coverage from one carrier to another or to enroll with a plan for the first time.

HEALTH COVERAGE FOR 2009-2010 & 2010-2011

Two plans are available:

Fee for Service-PPO Plan

3-tier fee-for-service indemnity plan

Insured may seek treatment anywhere from provider of choice

Services at UCSDMC and CHHC (tier 1), are generally covered 100% with no deductible and no co-insurance

Services obtained away from UCSDMC, within the PPO Network (tier 2), are generally covered at 80%, after satisfaction of a deductible amount

Services obtained outside of the PPO Network (tier 3), are generally covered at 60%, after satisfaction of a deductible amount

Co-pays are required at all participating providers including UCSDMC for Routine Exam, Emergency Room (unless admitted) and for Prescription Drugs.

Maximum annual out-of-pocket cost $1,000/PPO provider and $2,000/non-PPO provider (individual) and $2,000/PPO provider and $4,000/non-PPO (family).

Managed Care-HMO Plan

Insured must select a primary care provider who will manage the care.

No deductibles

Co-pays are required for Routine Exam, Outpatient Psychiatric Care, Prescription Drugs, Home Health Care, Emergency Room (unless admitted)

DENTAL COVERAGE

The dental plan provides comprehensive coverage for preventive, basic, major and orthodontic services. The insured may utilize the services of either a dentist participating in the plan-PPO or a dentist who does not participate in the plan-PPO. The greatest benefit will be paid when the insured utilizes the services within the PPO network.
VISION COVERAGE

The vision plan provides coverage for eye exams, lenses, frames, medically necessary contacts and cosmetic contacts. There is a deductible amount for services rendered. The plan requires that the insured uses specific participating providers in order to receive full benefits.

COBRA HEALTH CONTINUATION COVERAGE

House Officers’ and their insured dependents have the option of continuing medical, dental and vision plan benefits, at their own expense, upon termination of their plan coverage for any of the following reasons:

House Officer

- Reduction in hours of appointment
- Termination of appointment (for reasons other than gross misconduct)
- The plan terminated

Spouse/Domestic Partner

- Death of your spouse/domestic partner
- Termination of your spouse/domestic partner’s appointment (for reasons other than gross misconduct) or reduction in hours of appointment
- Divorce or legal separation

Dependent Child of an appointee covered by a UCSDMC health plan

- Death of a parent
- Termination of a parent’s appointment (for reasons other than gross misconduct) or reduction in hours of appointment
- Parent’s divorce or legal separation
- Dependent ceases to be a “dependent child” under the UCSDMC sponsored health plans

COBRA coverage is not automatic. An enrollment process must be followed within the timeframes established by Federal law.

LIFE INSURANCE PLAN, D-AD&D

In the event of the death of the covered House Officer, the plan will pay $50,000. If the death is accidental, the plan will pay $100,000. The proceeds will be placed in an interest bearing checking account for the beneficiary.

DISABILITY INSURANCE

Group long term disability insurance is provided to members of the Housestaff at no cost to the House Officer.

EMPLOYEE ASSISTANCE PROGRAM

The Employee Assistance Program (EAP) is a counseling and consultation service designed to help individuals and their eligible family members with a wide range of personal issues.
The services are confidential, and the cost is covered by the University. Services are available 24 hours a day, 7 days a week. The toll free number to call is 1-888-426-0023.

WORKERS’ COMPENSATION INSURANCE

If a House Officer sustains a work-related injury or illness, he/she is eligible to receive benefits under the Workers’ Compensation Laws. This program is designed to guarantee complete medical attention for the injury or illness and to insure regular monetary benefits as a means of financial support while the House Officer is medically unable to return to work. The premiums for this program are paid entirely by the University. There is no cost to the House Officer for the coverage nor is there a cost for necessary medical care for diagnosis and treatment.

When the injury occurs, the House Officer must immediately notify his/her supervisor of the incident to ensure that proper procedures are followed. If the supervisor is not immediately available, the House Officer must contact the Injury Prevention Disability Management Program and leave information, as instructed, identifying the injury/exposure. If immediate attention is required, the House Officer should go to either the UCSD Hillcrest or Thornton Emergency Department. For occupational exposures to blood and/or body fluids, the House Officer should immediately contact the Center for Occupational and Environmental Medicine. If urgent screening is required following a needlestick or blood exposure, the House Officer should immediately go to the UCSD Hillcrest or Thornton Emergency Department.

PROFESSIONAL LIABILITY COVERAGE

TYPE OF COVERAGE: UC Self-insured Retention (Self Insurance Program) LIMITS:
Tail Coverage is produced by virtue of the fact That the coverage is “per occurrence” $3,000,000 aggregate
Additional excess insurance available if needed

The UC Self Insurance Program will defend and indemnify house officers and medical students against professional or general liability or malpractice claim arising out of the house officer’s or medical student’s acts or omissions that are within the course and scope of his/her University duties, for work completed during the training period. The UC Self Insurance Program does not cover: (1) acts/omissions that are not within the course and scope of the house officer’s University duties, (2) acts or omissions resulting from fraud, corruption, malice or criminal negligence.

UC Self Insurance Program coverage for house officers and part-time, volunteer clinical faculty is limited to specific assignments in specific locations. Work at affiliated or associated hospitals or elsewhere is covered when it falls within the course or scope of the house officer’s University appointment. However, “moonlighting” is not part of the residency program and is not covered under the UC Self Insurance Program.

Questions regarding legal issues, including subpoenas should be addressed to the UCSDMC Office of Risk Management.

DEDUCTIONS

Deductions for State and Federal taxes as well as Medicare will automatically be made from House Officer earnings. Social Security (FICA) withholding will not be made, but in lieu of this,
7.5% of the House Officer’s pre-tax pay is directed to the Safe Harbor University of California Defined Contribution Plan. These non-voluntary contributions may be directed to one of the several University of California managed funds or to any one of over 100 Fidelity Investments funds.

House Officers may make voluntary contributions to the University of California 403 (b) Plan and 457 plans. Contributions come from pre-tax pay and may be made within certain limits.

When a House Officer leaves the University, monies from the Safe Harbor Defined Contribution Plan and the voluntary 403 (b) and 457 (b) plans may be handled as follows:

- May either be rolled over into a new employer’s retirement fund, or into an IRA; or
- May be left on deposit if the account has a minimum of $2,000 in the Plans; or
- Contributions and earnings may be paid to the House Officer, although the distribution is subject to penalties if the recipient is under the age of 59 ½, and the distribution is subject to taxation.

House Officers who are paid from funding sources that mandate a stipend payment in lieu of salary may not be eligible for one or more of the previously described features.

CHECK DISPOSITION

In most cases, the House Officer’s paycheck will be issued by the University of California at San Diego Payroll Office. House Officers are paid on a monthly basis in arrears (e.g., the August 1 paycheck represents July earnings). Checks may be directed to Surepay direct bank deposit, or the House Officer's campus or home address.

ON CALL QUARTERS

On call sleeping space is assigned to the clinical services. The sleeping space is clean, quiet and safe. On call quarters shall be serviced by the Housekeeping department on a daily basis. The Office of Graduate Medical Education will work closely with House Officers to address personal service issues.

Represented House Officers may refer to the Working Environment section of the SDHSA Memorandum of Understanding.

UNIFORM AND UNIFORM LAUNDERING

Three sets of uniforms (lab coats) are provided to the House Officers at the time of initial appointment. The lab coats will be laundered by UCSDMC at no charge to the House Officer. Uniforms that deteriorate through normal wear and tear shall be replaced by the Medical Center.

Represented House Officers may refer to the Uniform section of the SDHSA Memorandum of Understanding.
RESIDENT USE OF EMAIL

The special nature of residency programs requires ongoing communication between the residents, the training programs, administrators and others at UCSD Medical Center and affiliated institutions.

The policy of the Office of Graduate Medical Education requires that House Officers be available by email. House Officers are required to have and use a UCSD Medical Center email account that is provided at no cost. House Officers are expected to check their email at reasonably frequent intervals unless they are on approved leave. House Officers must comply with UCSD policies and state and federal laws that apply to email.

RECORDS POLICY

The University maintains as confidential the records of each House Officer, and the consent of the individual is required before access to records is allowed except where permitted or required by law, or where directly or routinely required in the administration of the training program. A House Officer may inspect his/her records in accordance with current privacy legislation and University policy.

GRADUATE MEDICAL EDUCATION ACADEMIC DUE PROCESS AND LEAVE GUIDELINES

I. INTRODUCTION

A. Definitions

Academic Deficiency: The terms “Academic Deficiency” or “Deficiencies” mean unacceptable conduct or performance in the professional and/or academic judgment of the Chair or Program Director, including failure to achieve, progress or maintain good standing in the Training Program, or achieve and/or maintain professional standards of conduct as stated below.

Associate Dean: The term “Associate Dean” means the Associate Dean for Graduate Medical Education.

Chair: The term “Chair” means the Chair of the Trainee’s specialty or subspecialty department, or his/her designee.

Clinical Competence Committee: The term “Clinical Competence Committee” means a committee of a School of Medicine department or division, and/or a committee specially selected by the Associate Dean for Graduate Medical Education in conjunction with the Chair, Graduate Medical Education Committee, that reviews the academic performance of Trainees.

Days: The term “days” means calendar days.

GME Training Program: The terms “graduate medical education training program” or “GME training program” refer to the second stage of medical education during which medical school graduates are prepared for independent practice in a medical specialty.
The foremost responsibility of the GME training program is to provide an organized education program with guidance and supervision of the Trainee, facilitating the Trainee’s professional and personal development while ensuring safe and appropriate care for patients. Graduate medical education involves the development of clinical skills and professional competencies and the acquisition of detailed factual knowledge in a medical specialty. These professional standards of conduct include, but are not limited to, professionalism, honesty, punctuality, attendance, timeliness, proper hygiene, compliance with all applicable ethical standards and UCSD policies and procedures (including but not limited to the UCSD Medical Center Medical Staff Code of Conduct Policy), an ability to work cooperatively and collegially with staff and other health care professionals, and appropriate and professional interactions with patients and their families.

A Trainee, as part of his or her GME Training Program, may be in a hospital, other clinical setting or research area. All such appointments, either initial or continuing, are dependent upon the Trainee maintaining good standing in a GME training program. Dismissal from a GME training program will result in the Trainee’s automatic dismissal from any and all related appointments such as medical staff membership.

Medical Disciplinary Cause or Reason: The term “medical disciplinary cause or reason” applies to a GME Trainee who holds a license from the State Medical Board of California and means that aspect of a licentiate’s competence or professional conduct that is reasonably likely to be detrimental to patient safety or to the delivery of patient care in accordance with Business and Professions Code section 805.

Program Director: The term “Program Director” means the Training Program Director for the Trainee’s specialty or subspecialty, or designee.

Trainee: The term “Trainee” includes all individuals appointed by UCSD’s School of Medicine to the titles of Resident Physician I-IX (title codes 2709, 2723, 2708, 2724), Chief Resident Physician (title code 2725, 2738), Resident Physician/Subspecialist IV-IX (title code 2726), Other Post M.D. Trainee II-IX (title code 2732), where specified by UCSD guidelines, or any other GME title assigned by UCSD.

Vice Chancellor: The term “Vice Chancellor” means UCSD Vice Chancellor Health Sciences or his/her Designee.

B. Preamble

The procedures set forth below are designed to provide the University of California San Diego (“UCSD”), UCSD resident physicians and other post-M.D. trainees (collectively referred to as “Trainees”) an orderly means of resolving differences. These Guidelines apply to UCSD sponsored programs of Graduate Medical Education (“Training Programs”). These Guidelines shall be the exclusive remedy for appealing reviewable academic actions. Deviation from these procedures that does not result in material prejudice to the Trainee will not be grounds for invalidating the action taken.

Additional time for remediation, either within the Training Program appointment or beyond the expiration of the Trainee’s current appointment, may be required to meet the educational objectives and certification requirements of the department or specialty. The Trainee will be notified in writing of any requirements for additional time. Funding for additional time extending beyond the original period of appointment will be permitted only at the discretion of the Associate Dean and upon written confirmation by the Associate Dean and the Program Director or Chair. Academic credit will be given only for full participation in the regular program unless otherwise approved by the Program Director or Chair.
At UCSD, the primary responsibility for remedial academic actions relating to Trainees and Training Programs resides within the departments and the individual training programs. Therefore, academic and performance standards and methods of training and evaluation are to be determined by each department and/or program at UCSD School of Medicine and UCSD Medical Center. There may be variances in these standards among the various departments and Training Programs.

Trainees and their supervisors are encouraged to discuss their concerns with one another and, if there are any disagreements or disputes, Trainees and their supervisors should make efforts to resolve them. The action(s) taken should be those that in the professional and/or academic judgment of the Program Director or Chair best address the deficiencies and needs of the Trainee and/or the Training Program. These actions are at the discretion of UCSD and need not be progressive. UCSD may select those action(s) described below that it deems appropriate.

A Trainee may request a correction or deletion of his/her academic file under this policy by submitting a written request to the Program Director. Within thirty (30) days of receipt of a written request to amend or delete a record, the Program Director will either make the amendment or deletion or inform the individual in writing that the request has been denied. If the Program Director refuses to amend or delete the record, the Trainee may enter into the record a statement setting forth the reasons for the Trainee’s disagreement with the record. Removal of documentation of action(s) from the Trainee’s file does not preclude the University from relying on the removed documentation should any subsequent academic action be taken or from communicating the information as required by law, upon receipt of a release from the Trainee, or to any appropriate third party such as a hospital, hospital medical staff or professional licensing board when such communication is intended to aid in the evaluation of the qualifications, fitness, character or insurability of the Trainee.

II. ACADEMIC ACTIONS - NON-DISMISSAL

A. Administrative Actions

1. Non Appealable Suspension

   The Trainee may be suspended from the Training Program for any of the following reasons:
   
   a. failure to complete and maintain medical records as required by the medical center or site in accordance with the center’s/site’s medical staff bylaws and/or rules and regulations;
   
   b. failure to comply with state licensing requirements of the California State Medical Board;
   
   c. failure to obtain or maintain proper visa status;
   
   d. unexcused absence from Training Program for three or more days;
   
   e. the inability to complete a rotation at an Affiliate Institution that is deemed essential to meeting the requirements of the Training Program;
   
   f. immediately prior to initiation of dismissal procedures under section III.B. if it is determined in the sole discretion of the Chair or Program Director that it would be in the best interests of patients, the program or the Trainee

   The period of suspension should not exceed fourteen (14) days; however, other forms of academic action may follow the period of suspension.

   The Chair or Program Director will promptly notify the Trainee of his/her suspension. In addition, for subsections b, c, d and e above, the Trainee will be provided the
documentation upon which the suspension is based and a written notice of the intent to consider the Trainee to have automatically resigned at the end of the suspension period (see Part II.A.2. below). The Trainee may utilize the suspension period to rectify (a) or to respond to the notice of intent under (b), (c), (d) or (e) which can include correcting the problem identified in (b), (c) or (e). If the Trainee is suspended under (a) and does not complete the medical records as required within the 14 day suspension period, other academic action may be instituted.

The Trainee will not receive any academic credit during the period of suspension. The Trainee’s stipend will continue to be paid while on this non-appealable suspension status.

2. Automatic Resignation

Automatic resignation from the Training Program will not entitle the Trainee to the procedures contained in Part III.B. of these Guidelines. Reasons for automatic resignation include:

a. Failure to Provide Visa or License Verification.

Failure of the Trainee to provide verification of an appropriate and currently valid visa or verification of current compliance with state licensing requirements of the state Medical Board of California during the 14 day suspension period may result in the Trainee’s automatic resignation from the Training Program.

b. Failure of trainee to achieve reversal of Affiliate’s decision to revoke the Trainee’s privilege to rotate to the Affiliate Institution during the 14 day suspension period may result in the Trainee’s automatic resignation or dismissal from the Training Program if the rotation at the Affiliate is deemed essential by the Program to meeting the requirements of the Training Program.

c. Absence without Granted Leave.

Trainees are expected to communicate directly with the Program Director in the event he or she is unable to participate in the Training Program for a period of time in excess of 48 hours. The Program Director may grant a leave in times of exceptional circumstances. If a Trainee is absent without leave for three (3) days or more, he or she may be considered to have resigned voluntarily from the program unless he or she submits a written explanation of any absence taken without granted leave. This explanation must be received by the Program Director within five (5) days of the first day of absence without leave.

The Program Director and Chair will review the explanation and any supporting documentation submitted by the Trainee regarding the absence without leave and notifies the Trainee of their decision within five (5) days. Failure to adequately explain or document the unexcused absence to the satisfaction of the Program Director and Chair will result in the Trainee’s automatic resignation from the Training Program.

3. Leaves

Investigatory leave and conditional leave of absence are not intended to replace any leaves that a Trainee may otherwise be entitled to under state or federal law or University policy.

a. Investigatory Leave

A Chair or Program Director may place a Trainee on investigatory leave in order to review or investigate allegations of deficiencies or circumstances where the Trainee may pose a threat to the health or safety of the public, patients or staff or
in situations where the Trainee’s own health or safety may be compromised. The leave will be confirmed in writing, stating the reason(s) for and the expected duration of the leave. The alleged deficiency should be of a nature that warrants removing the Trainee from the Training Program. The Chair or Program Director should, as soon as practicable under the circumstances, conclude the investigation and either return the Trainee to the program or initiate action under these Guidelines. The Trainee will be paid for the period of investigatory leave.

b. Conditional Leave

A conditional leave of absence from the Training Program may be provided only under exceptional circumstances, at the Chair’s discretion and upon the Trainee’s request. At the end of the conditional leave, the Chair will determine whether to re-admit the Trainee conditionally, unconditionally, on probation or to seek the Trainee’s dismissal pursuant to the procedures contained in these Guidelines. The Trainee will not be paid a stipend for the period of the conditional leave.

B. Non-Reviewable Academic Actions

The following actions are non-reviewable and may or may not be used sequentially or in tandem with one another:

- Counseling Letter
- Notice of Concern
- Probation

1. Counseling Letter

A counseling letter may be issued by the Program Director or Chair to a Trainee to address an academic or professional deficiency that needs to be remedied or improved. The purpose of a counseling letter is to describe a single instance of problematic behavior and to recommend actions to rectify the behavior. The Program Director will review the counseling letter with the Trainee. Failure to achieve immediate and/or sustained improvement or a repetition of the conduct may lead to other disciplinary actions. These actions are determined by the professional and academic judgment of the Program Director and/or the Chair and need not be sequential. For the purposes of this policy and for responses to any inquiries, a counseling letter does not constitute a disciplinary action.

2. Notice of Concern

A notice of concern may be issued by the Program Director or Chair to a Trainee who is not performing satisfactorily. Notices of concern should be in writing and should describe the nature of the deficiency(ies) and any remedial actions required on the part of the Trainee. A Letter of Concern is typically used when a pattern of problems emerges. The Program Director or Chair will review the notice with the Trainee. Failure to achieve immediate and/or sustained improvement, failure to meet any requirement(s) set forth in the letter, or repetition of the conduct may lead to additional actions. This action need not follow a counseling letter nor proceed other academic actions described later in these guidelines. A notice of concern does not constitute disciplinary action for purposes of these guidelines or for responses to inquiries.

3. Probation

Trainees who are in jeopardy of not successfully completing the requirements of the Training Program or who are not performing satisfactorily may be placed on
probation by the Chair or Program Director. Probation will be communicated to the Trainee in writing and should include: a description of the reasons for the probation, any required remedial activity, and the expected time frame for the required remedial activity. Failure to correct the deficiency(ies) within the specified period of time may lead to an extension of the probationary period or to other actions.

C. Academic Actions Appealable to the Clinical Competence Committee

Trainees may appeal the following actions to the Clinical Competence Committee:

- Suspension
- Adverse Annual Evaluation
- Non-renewal of appointment before four months prior to the end of the Trainee’s current appointment
- Repetition of an academic year
- Denial of a UCSD Certificate of Completion of Training

1. Suspension

The Chair or Program Director may suspend the Trainee from part or all of the Trainee’s usual and regular assignments in the Training Program, including clinical and/or didactic duties, for unprofessional or ethical behavior, for failing to comply with state law, federal law, or UC policies and procedures, or when the removal of the Trainee from the clinical service is required for the best interests of the Trainee, patients, staff and/or the Training Program. The suspension will be confirmed in writing, stating the reason(s) for the suspension and its expected duration. Suspension generally should not exceed sixty (60) days. Suspension may be coupled with or followed by other academic actions and will continue unless and until overturned by the Clinical Competency Committee after an appeal. A suspension may be paid or unpaid.

2. Adverse Annual Evaluation

Trainees will only be entitled to a review by the Clinical Competence Committee for annual evaluations that are adverse (overall unsatisfactory or marginal) ("Adverse Annual Evaluation"). Trainees will be notified by the Program Director of any Adverse Annual Evaluation.

3. Non-Renewal of Appointment Before Four Months Prior to End of Appointment

The Trainee’s appointment is for a one-year duration, which is normally renewed annually. Due to the increasing level of responsibilities and increasing complexity of clinical care over the course of the Trainee’s training, satisfactory completion of prior academic year(s) or rotation(s) does not ensure satisfactory proficiency in subsequent years or rotations. A Trainee may have his/her appointment not renewed at any time there is a demonstrated failure to meet programmatic standards.

The Program Director should provide each Trainee with a written evaluation at least twice per year. The first evaluation should occur no later than six months following the beginning of the appointment term. If the Program Director with the approval of the Chair concludes that the Trainee’s appointment should not be renewed for the following year, the Program Director will notify the Trainee of such. The Trainee will be permitted to conclude the remainder of the current academic year unless further academic action is taken.

A Trainee who is notified of the non-renewal of his/her appointment for the following year, before the four months prior to the end of his/her current appointment, will be
entitled only to the procedures contained in this Part II.D. of these Guidelines. (A Trainee who is notified of the non-renewal of his/her appointment for the following year after this time will be entitled to the procedures contained in Part III.B. of these Guidelines. See Part III.B.2.)

4. Requirement that Trainee Must Repeat an Academic Year

A Trainee may be required to repeat an academic year in lieu of dismissal from the Training Program due to unsatisfactory progress or other deficiencies at the discretion of the Program Director and Department Chair provided there are sufficient funds. Funds for the additional year must be identified with written confirmation by the Program Director or Chair to the Associate Dean.

5. Denial of University Certificate of Completion

If the Program Director, in consultation with the Chair, decides not to award the Trainee a University Certificate, the Program Director will notify the Trainee as soon as reasonably practicable of this intent.

D. Clinical Competence Committee Appeal Procedures

The Trainee will be notified as soon as reasonably possible that he/she has been suspended, received an Adverse Annual Evaluation, that his/her appointment will not be renewed (notice given more than four months before the end of his/her appointment), that he/she will be required to repeat the current academic year, or that s/he will not be granted a UCSD Certificate of Completion of Training.

In order to appeal, the Trainee must, within ten (10) days from the date of the notification, provide the Associate Dean with a written statement detailing the reasons he/she believes he/she should not have been suspended, should not have received an Adverse Annual Evaluation, should have had his/her appointment renewed (for the Trainee notified of non-renewal before four months prior to the end of his/her appointment), not be required to repeat the academic year, or should not be granted a UCSD Certificate of Completion of Training. The Associate Dean will appoint a Clinical Competence Committee to review the appeal. The Clinical Competence Committee will review the Trainee’s statement within twenty (20) days of the committee’s formation. The committee will review the decision to impose the academic action being appealed to determine whether it was arbitrary and capricious, The Clinical Competence Committee, at its discretion, may permit or request the personal attendance of the Trainee. While the Trainee has no right to representation by an attorney at the Clinical Competence Committee meeting, another person of his/her choice may accompany the Trainee.

The Clinical Competence Committee will orally notify the Trainee of its decision within three (3) days of its meeting and provide the Trainee a written decision within ten (10) days of the oral notification. The decision of the Clinical Competence Committee will be final. Failure by the Trainee to timely request a review before the Clinical Competence Committee will be deemed an acceptance by the Trainee of the academic action.

III. ACADEMIC ACTIONS - NON-RENEWAL OF APPOINTMENT WITHIN FOUR MONTHS OF END OF CURRENT APPOINTMENT AND/OR DISMISSAL

A. Grounds for Action

The following actions, if appealed, are reviewable by the Vice Chancellor:

- Dismissal from the Training Program;
- Non-renewal of appointment within four months of the end of the current appointment.

1. Dismissal From Training Program
Based on the Program Director’s discretion as approved by the Chair, a Trainee may be dismissed from the Training Program for academic deficiencies, including any of the following reasons:

a. Failure to achieve or maintain programmatic standards in the Training Program;

b. Serious or repeated act or omission compromising acceptable standards of patient care, including an act which constitutes a medical disciplinary cause or reason;

c. Unprofessional, unethical or other behavior that is otherwise considered unacceptable by the Training Program;

d. Material omission or falsification of Training Program application, medical record or other University document, including billing records;

e. Confirmations of findings in a criminal background check which could be considered a potential risk to patients and/or other individuals or considered unprofessional or unethical.

2. Non-Renewal of Appointment Within Four Months of End of Current Appointment

See Section II, C.3 of these guidelines for discussion of non-renewal of appointment.

B. Procedures

The Ad Hoc Formal Review Committee, see below, will handle all procedural matters during the actual hearing. At all other times, before and after the actual hearing, including up to the Vice Chancellor’s final decision, the Associate Dean will make all such decisions.

1. Level One - Informal Review

When the Program Director, with the approval of the Chair, determines that grounds exist to dismiss a Trainee or to not renew his/her appointment (notice given within four months of the end of the appointment date), the Program Director will provide the Trainee with written notice of the intent to dismiss or non-reappointment. This notice will include a statement of the reason(s) for the intended dismissal or non-renewal, a copy of the materials upon which the intended dismissal or non-renewal is based, and a statement that the Trainee has a right to respond in writing to the Chair within ten (10) calendar days of receipt of the notice. If the Trainee does not respond, the intended action shall become final eleven (11) calendar days after receipt of the notice or as otherwise noted by the Program Director. If the Trainee submits a written response within the ten-day period, the Chair will review it. The Chair will decide whether non-reappointment or dismissal is appropriate. Within 14 calendar days thereafter or as soon as reasonably possible, with the agreement of both parties, the Chair will notify the Trainee of the Chair’s decision by letter, which shall also be copied to the Program Director and Associate Dean. If the decision is to uphold the intended non-renewal or dismissal, the letter should include the reasons for upholding the proposed action, provide the effective date of the dismissal and include a copy of these guidelines. Attempts at informal resolution do not extend the time limits for filing a formal appeal unless the Trainee and the Program Director so agree, or upon the approval of the Associate Dean. The Trainee will continue to receive regular stipends until the effective date of the dismissal or appointment end date.

2. Level Two - Formal Review
If the Trainee wishes to appeal the Chair’s decision to dismiss or not reappoint, the Trainee must send a written appeal to the Associate Dean no later than thirty (30) days after the Trainee receives the Chair’s decision. The written appeal should concisely explain why the Trainee believes the Chair’s decision was arbitrary and capricious and should address the specific reasons for the dismissal or non-reappointment set forth in the Program Director’s notice of intent to dismiss or to not reappoint.

The Trainee may be assisted or represented by another person at his or her own expense. UCSD may also be represented. If the Trainee is represented by an attorney, he/she shall notify the Associate Dean within fifteen (15) days of initiating the appeal. The University will not be represented by an attorney if the Trainee is not so represented. The Trainee must appear in person at the hearing, even when represented. The failure of the Trainee to appear in person for the full duration of the hearing will be deemed a voluntary dismissal of his/her appeal.

Within ten (10) days of receipt of the appeal, or as soon thereafter as is practicable, the Associate Dean will appoint an Ad Hoc Formal Review Committee to hear the appeal. The Committee will consist of three members, at least one of which shall be a member of the full-time faculty, one senior trainee (PGYIII or higher), and one faculty member of the Graduate Medical Education Committee. The Associate Dean will designate one of the Committee members to be the Committee Chair. If possible, one of the Committee members should be from the same department as the Trainee; however, individuals who were substantially involved in any earlier review of the issues raised in the appeal, or who were substantially involved in any incident underlying the appeal generally should not sit as a member of the Committee. The Associate Dean may, at its discretion, request that an attorney from the Office of the General Counsel be appointed to provide independent legal counsel to the Committee. This attorney shall not vote in the Committee’s deliberation process. Until the appointment of a Committee Chair, the Associate Dean will resolve all issues related to these procedures.

The Hearing will ordinarily be held within forty-five (45) days of receipt of the appeal by the Associate Dean. Unless otherwise agreed by the Parties and the Chair, the Trainee and his/her advocate, if any, will meet at least fifteen (15) days prior to the Hearing at a pre-hearing conference with the Committee Chair, the University representative and the University advocate (if any) to agree upon the specific issues to be decided by the Committee. If the parties are unable to reach an agreement on the issues to be decided, the Committee Chair will determine the issues to be reviewed. Issues that were not raised in the notice of intent to dismiss or to not reappoint, the Trainee’s written and timely response thereto, or the notice of the Chair’s decision, may not be raised in the Hearing absent a showing of good cause. At this conference, the parties may raise other procedural and substantive issues for decision by the Chair.

At least ten (10) days prior to the Hearing or at another date agreed to by the Parties and the Chair, all documents to be introduced as evidence at the hearing and names of all witnesses shall be exchanged. With the exception of rebuttal witnesses and documents used in rebuttal, any witnesses not named and documents not exchanged ten (10) days before the hearing may, at the Committee Chair’s discretion, be excluded from the Hearing.

The Hearing will provide an opportunity for each party to present evidence and cross-examine witnesses. The Committee Chair has broad discretion regarding the admissibility and weight of evidence and is not bound by federal or state rules of evidence. If requested by either party, the Committee will take judicial notice of (i.e.,
recognize as a fact the existence of) any University policies. The Committee Chair will rule on all questions of procedure and evidence. The hearing will be recorded on audio tape by the University unless both parties agree to share the cost of a court reporter, or one party elects to pay the entire cost for the reporter in order to have a transcript for its own use, in which case the other side may purchase a copy of the transcript for half the cost of the court reporter and transcription plus any copy costs. The Trainee may listen to any audio tape and may purchase a copy of the audio tape. The Associate Dean will be the custodian of the audio tape and any stenographic record, and will retain the recording for five (5) years from the time the Vice Chancellor’s decision becomes final.

Unless both the Trainee and the University agree to an open hearing, the hearing will be closed. All materials, reports and other evidence introduced and recorded during the course of a closed proceeding may not be disclosed until the final resolution of the appeal under these procedures except as may be required by applicable law. At the request of either party or the Committee Chair, only the witness testifying may be present and other potential witnesses will be excluded. However, the Trainee, his/her advocate and the University’s representative and its advocate will at all times have the right to attend the hearing.

The Trainee has the responsibility of establishing that the dismissal or non-renewal was arbitrary and capricious. The University will initially come forward with evidence in support of the Chair’s decision. Thereafter, the Trainee will present his/her evidence. The parties shall have the opportunity to present rebuttal evidence. The Committee Chair has the right to limit rebuttal evidence at his/her discretion.

At the discretion of the Committee, briefs may be submitted. The Committee Chair will determine the appropriate briefing schedule, if any. If briefs are not requested, each party shall have the opportunity to present a closing statement. Following the close of the Hearing, including receipt of any briefs, the Committee will present its written recommendation(s) to the Trainee, the Chair, Program Director and Associate Dean. This recommendation(s) should occur, absent unusual circumstances, within fifteen (15) days of the Hearing’s conclusion, or if briefs are submitted, within fifteen (15) days of the date the briefs are submitted.

The Committee will evaluate the evidence presented and prepare a recommended decision that shall contain written findings of fact and conclusions. The decision of the Chair will be upheld if the Committee finds that the Trainee has not met its burden and established by a preponderance of the evidence that the Chair’s decision was arbitrary and capricious. The recommended decision shall become final after fifteen (15) days unless an appeal is filed pursuant to III.C.

C. Decision By Vice Chancellor

Within fifteen (15) days of receipt of the Committee’s recommendation(s), either party may submit a final written response to the Committee’s recommendation(s) to the Vice Chancellor. Any such response submitted to the Vice Chancellor must be limited to:

1. Whether there is new evidence that could not reasonably have been introduced at the hearing and would be likely to change the result.

After receipt of the Committee’s recommendation, the parties’ written response (if any), and the record, the Vice Chancellor within sixty (60) days, or as soon as practically reasonable thereafter, will take any action deemed appropriate, including upholding the Committee’s Recommended Decision, rejecting the Committee’s recommendation or remanding the matter back to the Committee with instruction for
further review and recommendation. The Vice Chancellor's ultimate decision will be final and will be in writing and sent to the Program Director, the Chair, the Trainee, the Associate Dean and the Ad Hoc Formal Review Hearing Committee Chair.

D. Remedy

If the Trainee appeals and the Chair’s decision is not upheld, the remedy will not exceed restoring the Trainee’s stipend payment, benefits or any rights lost as a result of the action, less any mitigating income earned from other sources.

SPECIAL REQUIREMENTS FOR HOUSE OFFICERS

CALIFORNIA MEDICAL LICENSE

UCSD Medical Center encourages House Officers to apply for their medical license in California within 60 days of reaching eligibility for licensure. Once licensed, House Officers must maintain a full and unrestricted license in order to continue their appointment. Should a House Officer's license be placed on probation, his/her continuation in training will be at the discretion of the Program Director and Associate Dean for Graduate Medical Education. Appointments at the PGY3 level and beyond require a full and unrestricted California medical license. Appointments will not be made for any House Officer who is on probation from the Medical Board.

The California Medical Practice Act permits medical and osteopathic school graduates to practice medicine within the scope of their ACGME approved training program without a license in this State while they are fully registered with the Medical Board of California as follows:

GRADUATES OF MEDICAL SCHOOLS IN THE US, PUERTO RICO AND CANADA

- May train for the first year following graduation from medical school at the intern/PGY-1 level for a period not to exceed 12 months from the commencement of the PGY-1 year of training; and
- May continue for a second year of training in this State at the PGY-2 level for a period not to exceed 12 months from the commencement of the PGY-2 year of training. At the conclusion of the PGY-2 year, the House Officer must be licensed in order to continue in training in this State; or
- US, Puerto Rican and Canadian medical school graduates must hold a full and unrestricted license to practice medicine in this State upon completion of 24 months of approved postgraduate medical education.

GRADUATES OF INTERNATIONAL MEDICAL SCHOOLS

- An international medical school graduate must be registered with the Medical Board of California prior to commencement of training in an ACGME approved training program in this State.
- To qualify for licensure the physician must meet one of the following requirements:
  - Completion of a minimum of two years of ACGME postgraduate training; or
  - Completion of 12 months of ACGME postgraduate training and current certification by a member board of the American Board of Medical Specialties or a specialty board approved by the MBC-Division of Licensing; or
Completion of 12 months of ACGME postgraduate training and successful completion of the computerized clinical competency exam (SPEX) in the State of California.

The international medical school graduate must hold a full and unrestricted license to practice medicine in this State upon completion of 36 months of ACGME approved postgraduate medical education in the United States.

House Officers who have not obtained a license within the prescribed time frames will not be allowed further patient contact and may be terminated from their training program. For the duration of training, a full and unrestricted California medical license must be continually maintained as a prerequisite for continued appointment.

---

**CRIMINAL BACKGROUND CHECK**

**CRIMINAL BACKGROUND CHECK (CBC) POLICY: HOUSE OFFICERS**

Completion of a satisfactory CBC will be a requirement for all newly appointed physicians in training sponsored by UCSD School of Medicine/UCSD Healthcare, effective 6/23/08. During training, once licensure is required, the ability to obtain and maintain licensure will serve as evidence of an ongoing satisfactory CBC.

**PROCEDURES**

1) Contracts sent by the Office of Graduate Medical Education will include a statement about the requirement of a satisfactory CBC as a condition of employment.

2) CBC's will be performed by reputable company through the usual business contracting arrangements.

3) Matched physicians-in-training and current housestaff will be asked to provide appropriate authorization, with the pertinent identifying information necessary to initiate the check.

4) Those undergoing the CBC will have an opportunity before any information is released to UCSD to review the data for accuracy.

5) The following databases would be searched:

   a. Social Security Number Validation
   
   b. Analyzed Social Security Number Search
   
   c. County Criminal Records Search
   
   d. National Criminal File Search
   
   e. National Sexual Offender Database Search
   
   f. Sanctions Base Search
   
   g. Motor Vehicle Records/Driving Records Search
6) CBC reports for new physicians-in-training will be reviewed by the DIO/Associate Dean for Graduate Medical Education, the Chair of the Graduate Medical Education Committee and the physician-in-training’s Program Director, in consultation with the Department’s Education Committee, who will make a decision about entry into the program. There is no appeal to this decision.

7) CBC reports for current physicians in training will be reviewed by the DIO/Associate Dean for Graduate Medical Education, the Chair of the Graduate Medical Education Committee and the physician-in-training’s Program Director, in consultation with the Department’s Education Committee, who will make a decision about continuation in the program. Should a decision of termination be made, the appeal mechanism specified in UCSD’s House Officer Policy and Procedure Document will apply.

NARCOTIC REGISTRATION

A House Officer who is licensed in the State of California may apply for a Drug Enforcement Administration number by completing DEA Form #224 online. This form can be found on the DEA’s website, http://www.deadiversion.ucdoj.gov.

There is no charge for the DEA registration (the fee will be exempt) if the House Officer uses the UCSD business address on the application, and identifies the Director, Office of Graduate Medical Education, as the certifying official.

House Officers can use the UCSDMC Institution DEA number (by very clearly noting their 5 digit UCSDMC provider number) when they write inpatient prescriptions that are to be filled at UCSDMC, Hillcrest and Thornton sites. House Officers may not write prescriptions for controlled substances for discharged patients or outpatients without a personal DEA number even if the prescription is to be filled at UCSD Medical Center.

TRAINING AT AFFILIATED GME TRAINING SITES

Additional screening and procedural requirements may be mandated by affiliated institutions while trainees are rotating through those sites as a part of their GME training program at UCSD.

TRAINING IN ACLS AND PALS

House Officers who are in training programs involved with responding to code blue are required to be certified in a training program approved by UCSD Medical Center. Trainees in other programs are encouraged as well to become certified.

EDUCATIONAL ENVIRONMENT CONDUCIVE TO OPEN EXCHANGE OF IDEAS

UCSD assures an educational environment in which House Officers may raise and resolve issues without fear of intimidation or retaliation by administration, faculty and/or staff through the following organizational system:

Members of the Housestaff may bring forward issues regarding their working environment and their educational programs in a confidential and protected manner at any time to the Associate Dean for Graduate Medical Education, to the Chair of the Graduate Medical Education Committee who represents the GMEC and to the Director, Office of Graduate Medical Education.
House Officers may also bring issues to the attention of the Graduate Medical Education Committee through their membership on that committee.

House Officers are also encouraged to discuss issues that require attention or resolution regarding their educational experience with their Chief Residents, Training Program Directors and with their Department Chair/Division Chief.

The approved UCSD Graduate Medical Education Academic Due Process and Leave Guidelines document ensures the house officer fair policy and procedure for academic or other disciplinary actions which may be taken against house officer.
The House Officer Policy and Procedure Document will be reviewed on an annual basis, or as otherwise needed, by the Graduate Medical Education Committee and by the Associate Dean for Graduate Medical Education, the Director, UCSD Medical Center and by the Dean, School of Medicine. Revised documentation will be forwarded to all House Officers.

Approved:

Shawn Harrity, M.D.
Chair, Graduate Medical Education Committee

Stephen R. Hayden, M.D.
Associate Dean for Medical Education and DIO

Thomas Jackewicz, M.D.
CEO, UC San Diego Medical Center

Maria C. Savoia, M.D.
Vice Dean for Medical Education

Date
