

iPhone/iPad/iOS: ([Android instructions](#))

If you want to save just the webpage link as a homescreen app icon:

Go to https://medschool.ucsd.edu/som/surgery/divisions/trauma-burn/training/protocols/Documents/UCSD-TRAUMA_HANDBOOK_5-1.pdf

1.

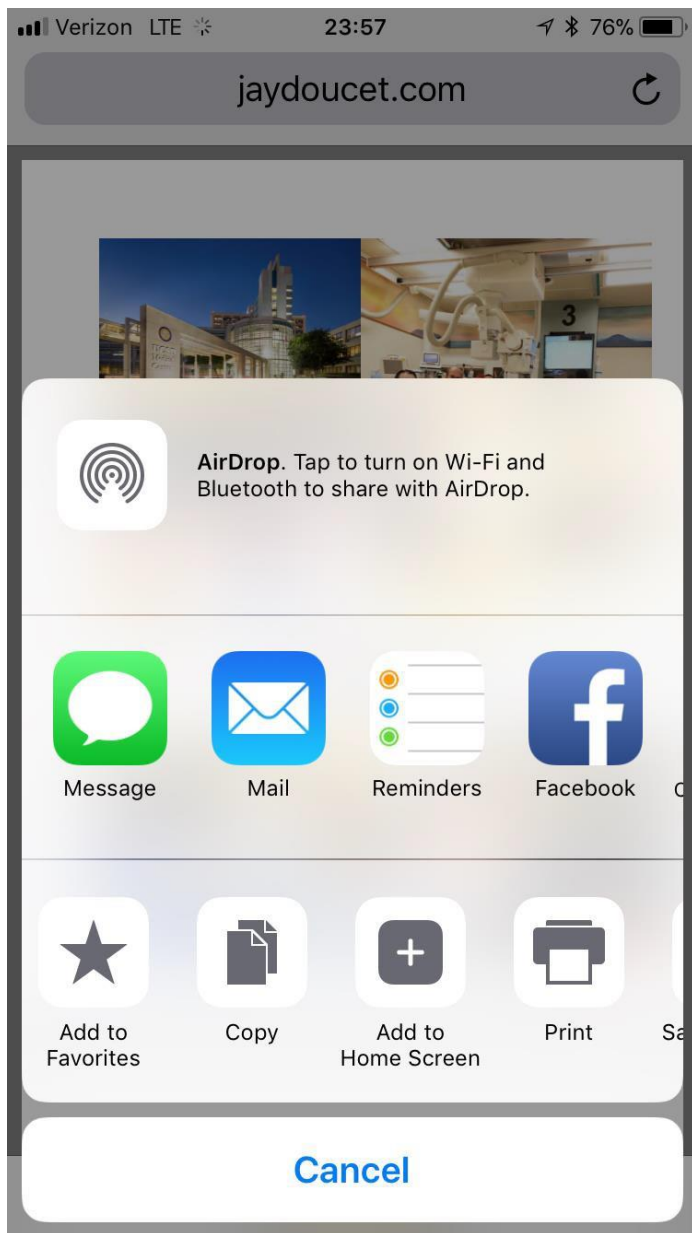

2. Open the link: https://medschool.ucsd.edu/som/surgery/divisions/trauma-burn/training/protocols/Documents/UCSD-TRAUMA_HANDBOOK_5-1.pdf

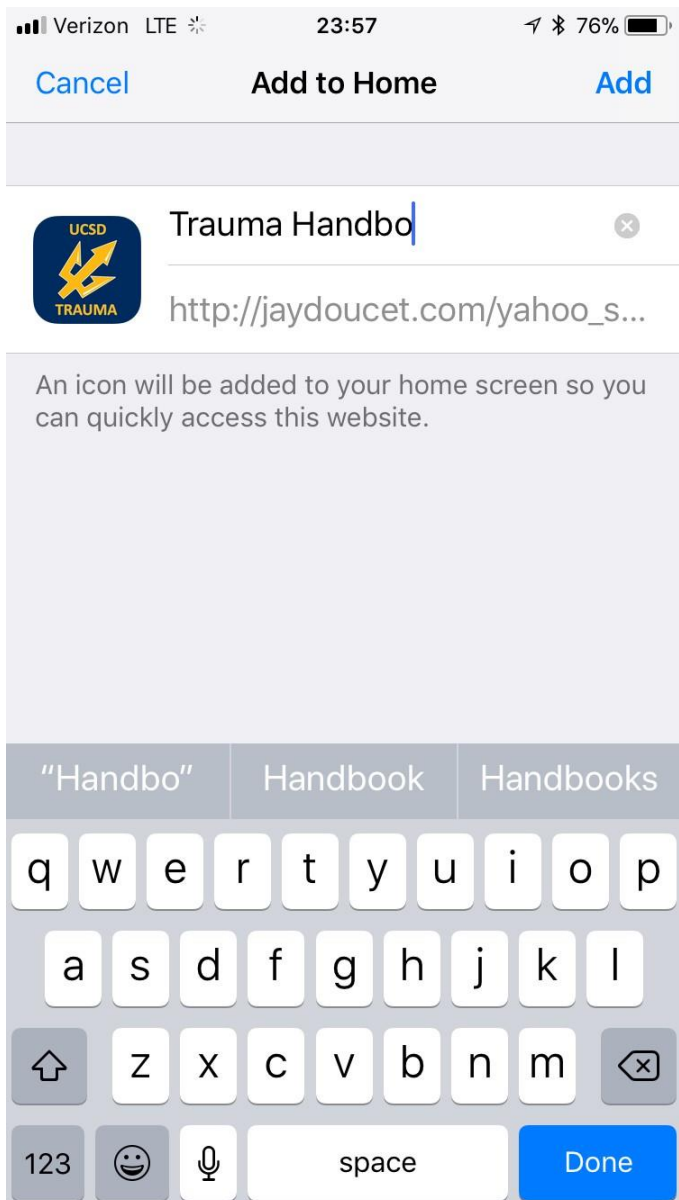

3. When the file opens click on the middle box with the top arrow

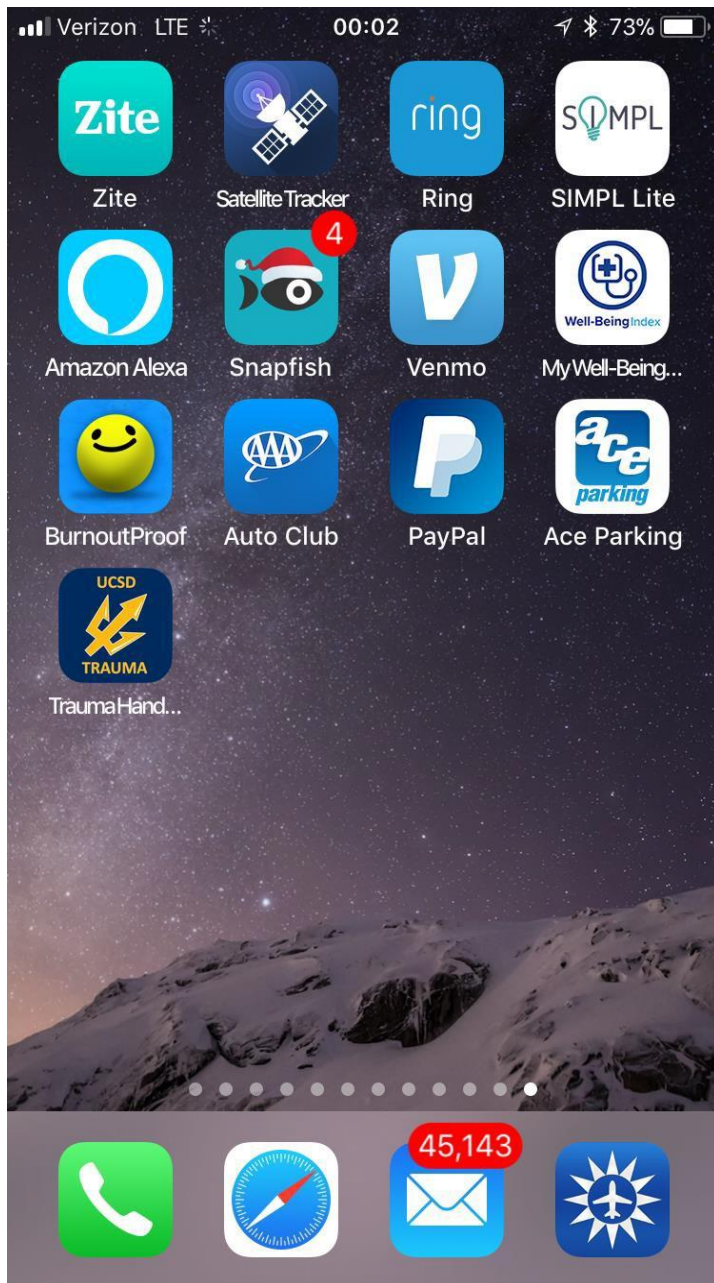

4. In the pop-up window click on “Add to Home Screen”

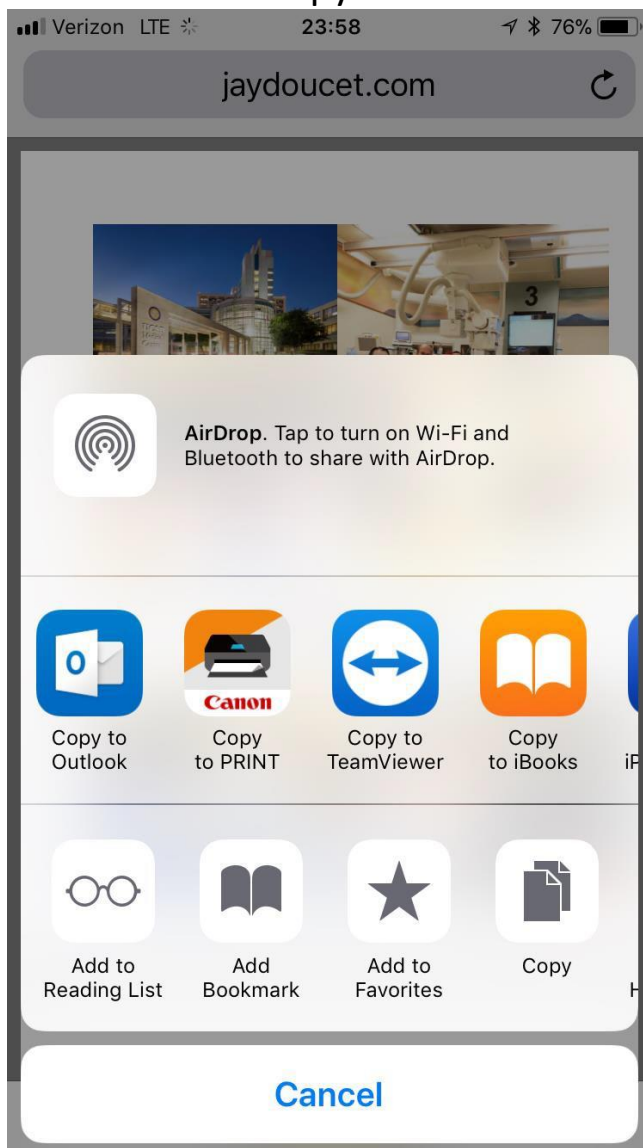

5. Change the bookmark name so it suits you – i.e. “Trauma handbook”

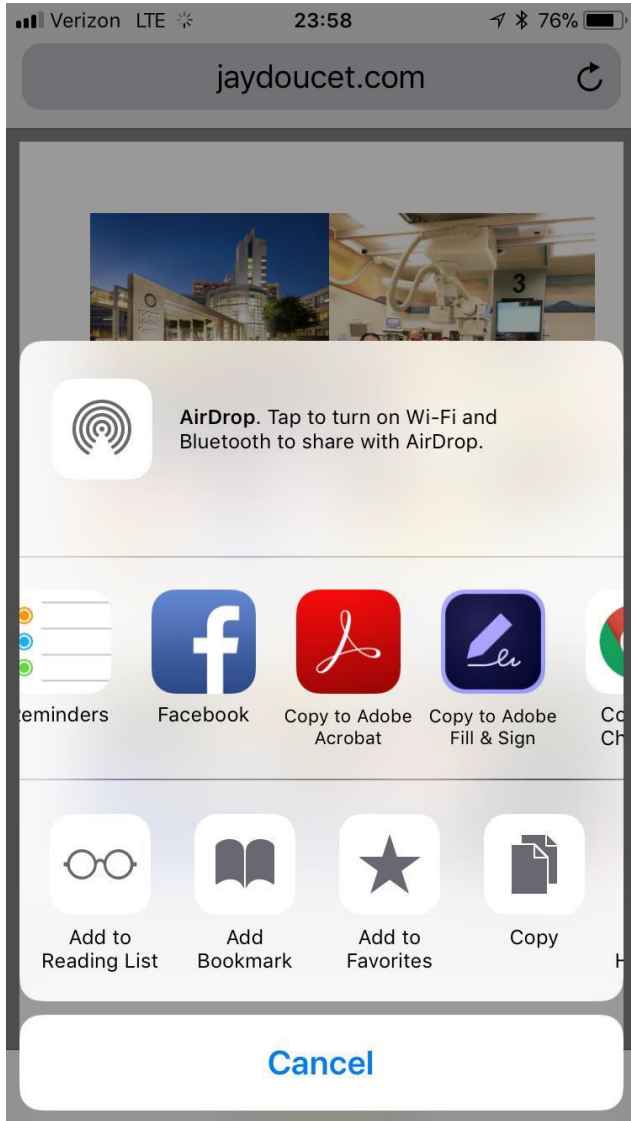

6. Once your done, click the “add” button – voila – enjoy your new ‘app’!

You can also save the whole 15 MB Handbook as the complete PDF file on your phone, so it is available without WiFi:

- Follow the steps above to step 4.
- Then instead of clicking “Add to home page”, scroll the icons until you see “Copy to iBooks”
- Click on “Copy to iBooks” and the file will be saved in iBooks.

- You can also copy and save to other PDF apps like “Adobe Acrobat”, Evernote, etc...

Good luck!
